A. To Discuss the Safe Routes to School Project (Collazo)

Councilmember Collazo motioned to waive the 3-minute special rules. Vice Mayor N. Rodriguez seconded the motion.

Councilmember Collazo stated that he called this special call due to the community outcry to preserve the existing canopy. He stated the Safe Routes to School Project has been a part of the Town's Greenways and Trails Plan to improve bicycle and pedestrian safety since 2008. Throughout this period, the council has sought funding and allocated expenditures for this project. In early part of 2019, Councilmember Collazo stated the scope of this project included removal of 50 trees due to an installation of 8 to 10 ft walking and biking path. He stated he met with Town Manager Edward Pidermann and staff to discuss the plan to remove trees along Miami Lakeway South and North. During these meetings, Councilmember Collazo stated he asked the Town Manager and staff to walk him through the project and asked why so many trees needed to be removed. On their scheduled site visit, the Town Manager Pidermann said he would re-visit this issue and asked staff to come up with tree mitigation plan.

Councilmember Collazo stated the commencement project was scheduled for the 1<sup>st</sup> week of October. He asked the Town Manager and staff to review the tree mitigation plan and the Town Manager and staff was able to drop only 20 trees to be removed. However, Councilmember Collazo said a part of the Safe Routes School Plan still impacts a large portion of the tree canopy near Celebration Point. He stated he is not comfortable with this and is asking the Town Manager and staff to mitigate more trees. He stated that if more trees are unable to be mitigated, then he is not in favor with moving forward with the Safe Routes to School project. He thanked staff and the Town Manager for trying to address all the concerns and is interested staff recommendations on how to address the tree mitigation.

The Town Manager Pidermann stated that staff has been working on tree mitigation plan and is trying to work under the confines of the FDOT grant guidelines and approved budget. Carmen Olazabal, the Town's Planning, CIP and Special Services Director, along with staff have tried to develop with solutions to mitigate trees as well as using different materials such as porous concrete along Miami Lakeway Drive. However, these changes will affect the project's cost to go up.

The Town Manager stated also that the staff came up with recommendations to interrupt the trail near Celebration Point. The trail would start from Miami Lakes K-8 center and it runs Northeast until the end of Miami Lakes K-8 Middle as the Town Manager explained. These changes would require the Town to go back to FDOT for more funding. The Town Manager stated he hoped the motion from the council would be to price out the options and meet with FDOT to see if its possible to interrupt the trail in this new plan. He stated no shade trees will be sacrifice. It will be 10 sable tress that are 14 inches in diameter or less, and 1 weeping bottlebrush tree.

After much discussion and public comments, Councilmember Collazo motioned to resind the commencement date of the project. Councilmember Dieguez seconded the motion. All were in favor. Councilmember Dieguez asked the Town Manager what the consequences were if the Town backed out of the grant project and the Town Manager Pidermann said he would have to meet with FDOT to find out. He believes it would jeopardize future funding and certification with them.

Deputy Town Attorney Lorenzo Cobiella elaborated on the new Florida House Tree Bill. Deputy Town Attorney explained if the tree is on the swell area homeowners need to seek a permit from the Town that and the Town arborist must attest there is something wrong with the tree or is causing endangerment. The State law allows homeowners to cut down the tree on their property with out permitting. But homeowners still need to hire a certified arborist to state the tree is endangerment or it is sick.

Councilmember Dieguez asked the Town Manager what percentage of the project's funding was coming from FDOT or PTP and the Town Manager explained the percentage.

Councilmember Alvarez asked if the latest plan included using the Town 's budget money or just PTP or FDOT for the project. The Town Manager says he needs to work with staff to run the numbers to set how much mu\money is needed to offset set.

Councilmember Ruano asked how much money needs to be returned to FDOT and the Town Manager responded with \$50,000. Councilmember Ruano suggested the project either needs to not happen if it can't incorporate the Miami Lakes way.

Councilmember J. Rodriguez stated he spoke with residents in the area where their driveways and walkway will be affected by installing a 10-foot sidewalk. The 14 residents are not happy about this he stated. He suggested to pause this project and analyze on how to improve it.

Vice Mayor N. Rodriguez mentioned that the 170<sup>th</sup> street sidewalk project was a success and is being used by pedestrians and children. But this project should not include cutting down 57 trees shade tree in order to accomplish this. The project needs to be put on paused and re-assessed.

Mayor Cid stated that after speaking with the Town Manager he is in favor of a walkability community and having safety for pedestrians, but he acknowledges that the canopy is important. The project needs to be paused.

Councilmember Alvarez motioned to amend the main motion to alter the plan to reassessed effecting those 14 homes Councilmember J. Rodriguez spoke on. Councilmember Collazo seconded and all were in favor.

After much discussion on the sidewalk size and how to offset the costs, Councilmember added another amendment to the main motion. He motioned the Town Manager to meet with FDOT to discuss a new plan that includes more for tree canopy protection Councilmember J. Rodriguez spoke with residents to include 6-foot to 8-foot sidewalks. Furthermore, would like staff to come back with more cost assessments.

The Town Clerk called the roll, on the main motion as amended, and the motion passed 7-0.

Councilmember Collazo motioned that the Town Manager and staff re-examined all upcoming projects to identify similar impacts as this project has to the tree canopy. Councilmember Dieguez seconded. All were in favor.

Councilmember Collazo motioned to direct the Town Manager and staff to request a lower speed zone along the pedestrian path from Crooked Palm to Miami Lakes K-8 center. Vice Mayor N. Rodriguez seconded the motion.

Mayor Cid motioned to extend to 12 AM and Councilmember Collazo seconded the motion. All were in favor.

B. To Discuss the Florida Department of Transportation (FDOT) Safe Routes to School (SRTS) Program for the Bob Graham Education Center - \$241,143 (Cid)

Mayor Manny Cid stated this project will not impact the tree canopy. The Town Manager Pidermann concurred. It's about adding crosswalks and some extension of sidewalks from 6- feet to 8-feet.

Councilmember Dieguez suggested this size of sidewalk be used for the Safe Routes School Project.

He also stated that he believes it would help the decision-making process and reduce the political battles among different groups, and that it would enhance the area.

Homero Cruz, resident of Royal Oaks, agreed with the statement given by Mr. Garciga. He did mentioned that he would suggest maybe increasing the number from 7 to 9 members and explained that the Royal Oaks Association Board has 5 members, and that he would like all 5 members to be part of the Special Taxing District and then bring on 4 non-HOA members (2 from the East and 2 from the West) and have these 9 members be part of the combined Special Taxing District. Mr. Cruz also acknowledged that the Special Taxing District only makes recommendations and that the final decisions are to be made by the Town Council. He also stated that there are 1,250 homes in the Special Taxing District and 666 homes are in the Royal Oaks Association; so, about 53% of all the homes are in the Royal Oaks Association.

# Town of Miami Lakes Memorandum

To:	Honorable Mayor & Councilmembers
From:	Edward Pidermann, Town Manager
Subject:	ITB 2019-32 Refuse & Recycling Services
Date:	December 10, 2019

# **Recommendation:**

It is recommended that the Town Manager award a contract to Great Waste and Recycling Services, LLC ("Great Waste"), the lowest responsive and responsible bidder, for Refuse and Recycling Services for Town Facilities in an amount not to exceed budgeted funds. The contract will be for a three (3) year period with two (2) one-year options to renew. Funds are budgeted for these services in the Parks – Community Services line items in the General Fund and the Facilities Maintenance Fund.

#### **Background**

The Work consists of furnishing all labor, materials, machinery, tools, means of transportation, supplies, equipment, and services necessary for Refuse and Recycling Services for the Government Center, Royal Oaks Park, Miami Lakes Optimist Park, Miami Lakes Picnic Park West, and the Youth Center ("Town Facilities").

The Town issued ITB 2019-32 for Refuse and Recycling Services for Town Facilities on July 25, 2019. The ITB was posted to DemandStar, Public Purchase, and posted in the Government Center Lobby.

To qualify for award, prospective Bidders were required to:

- 1. Possess a minimum of five (5) years of experience as a licensed waste hauler and recycler in the State of Florida; and
- 2. Provide verifiable client references demonstrating the successful completion of at least three (3) refuse and recycling projects of similar size, scope and complexity performed within the last seven (7) years.

On the date of the bid opening deadline, August 15, 2019, we received three (3) bids from the following Bidders:

- 1. Great Waste and Recycling Services, LLC ("Great Waste") \$75,760.80
- 2. Waste Management Inc. of Florida ("Waste Management") \$99,462.96
- 3. Coastal Waste & Recycling of Miami-Dade County, LLC ("Coastal Waste") \$104,314.90

Procurement performed a due diligence review of the bids for responsiveness and found that Great Waste, the lowest bidder, submitted a responsive bid. Procurement's due diligence review did not reveal any material defects in the bid, nor in Great Waste's qualifications. Great Waste has been in business for eight (8) years, is licensed to do the work, and provided three (3) positive references for projects completed for other agencies, including Miami-Dade County Public Schools, the City of Doral and Miami-Dade County. Procurement did not find any issues that would indicate that Great Waste was incapable of performing the work.

In accordance with Section B2.03 Estimated Quantities of the ITB, for purposes of keeping this service within budget, Procurement adjusted the pulls per week at Royal Oaks Park, Optimist Park, and Picnic Park West (See Exhibit A, attached hereto).

Based on our review of the bid submittals and the adjusted quantities, we have determined that Great Waste is still the lowest responsive and responsible bidder and their bid prices are fair and reasonable. As such, it is recommended that the Town Manager award a contract in an amount not to exceed budgeted funds to Great Waste and Recycling Services, LLC.

# C4.01 CHANGE ORDERS

Without invalidating the Contract Documents, and without notice to any Surety, the Town reserves the right to make increases, decreases or other changes in the character or quantity of the Work under the Contract Documents as may be considered necessary or desirable to complete the Work in a manner satisfactory to the Town. The Town reserves the right to order changes which may result in additions to or reductions from the amount, type or value of the Work shown in the Contract, and which are within the general scope of the Contract Documents, and all such changes will be authorized only by a Change Order approved in advance, and issued in accordance with provisions of the Town.

The Contractor is required to provide the Project Manager with a detailed Change Proposal Request ("CPR") or Request for Change Order ("RCO"), utilizing the Town's standard form, which must include requested revisions to the Contract, including but not limited to adjustments in this Contract Price and Contract Time. The Contractor is required to provide sufficient data in support of the cost proposal demonstrating its reasonableness. In furtherance of this obligation, the Town may require that the Contractor submit any or all of the following: a cost breakdown of material costs, labor costs, labor rates by trade, and Work classification and overhead rates in support of Contractor's CPR/RCO. The Contractor's CPR/RCO must include any schedule revisions and an explanation of the cost and schedule impact of the proposed change on the Project. If the Contractor fails to notify the Project Manager of any schedule changes associated with the proposed change, it will be deemed to be an acknowledgment by Contractor that the proposed work will not have any scheduling consequences.

Any changes to the Contract must be contained in a written Change order, using the Town's Change Order Form, executed by the both parties. However, under circumstances determined necessary by the Town, a Change Order may be issued unilaterally by Town.

In the event a satisfactory adjustment cannot be reached and a Change Order has not been issued or time is of the essence, the Town reserves the right, at its sole option to direct the Contractor to proceed on a time and materials basis or make such arrangements as may be deemed necessary to complete the proposed additional Work.

Where the Town directs the Contractor to proceed on a time and materials basis, Contractor must maintain detailed records of all labor and material costs for review by the Town.

For all Change Orders the Contractor will be entitled to a combined profit and overhead rate for Change Orders that will not be in excess of ten (10%) percent inclusive of all direct/indirect costs including labor, material, and equipment costs, unless the Procurement Manager determines that the complexity and risk of the Change Order work is such that an additional factor is appropriate.

The final amount to be paid to the Contractor for Change Order Work is subject to negotiation between the Town and the Contractor.

Failure by the Contractor to proceed with Change Order Work when so directed by the Town Manager or designee may result in the Contractor being found in default of the Contract.

Contractor must utilize the Town's standard requests for change orders and change order forms unless otherwise specifically approved by the Town's Procurement Manager. The Town's Forms are available on the Town's website.

# C4.02 FORCE MAJEURE

Should any failure to perform on the part of Contractor be due to a condition of Force Majeure as that term is interpreted under Florida law, then, the Town may allow an extension of time reasonably commensurate with the cause of such failure to perform or cure.

If the Contractor is delayed in performing any obligation under the Contract Documents due to a force majeure condition, the Contractor must request a time extension from the Town within two (2) working days of said Force Majeure occurrence. Any time extension will be subject to mutual agreement and will not be cause for any claim by the Contractor for extra compensation unless additional services are required by the Town. A Force Majeure event **does not include** inclement weather except for significant weather events that adversely impact the critical path of the Project Schedule, if required, or completion of the work, and **does not include** the acts or omissions of Subcontractors or suppliers.

# C4.03 EXTENSION OF TIME

Any reference in this Article to the Contractor will be deemed to include suppliers, and permitted Subcontractors, whether or not in privity of contract with the Contractor for the purpose of this Article.

If the Contractor is delayed at any time during the progress of the Work beyond the time frame or date provided for Final Completion by the neglect or failure of the Town or by a Force Majeure, then the Contract Time set forth in the Contract will be extended by the Town subject to the following conditions:

- 1. The cause of the delay arises after issuance of the NTP and could not have been anticipated by the Contractor by reasonable investigation before proceeding with the Work;
- 2. The Contractor demonstrates that the completion of the Work will be actually and necessarily delayed;
- 3. The effect of such cause cannot be avoided or mitigated by the exercise of all reasonable precautions, efforts and measures whether before or after the occurrence of the cause of delay.

A delay meeting all the conditions of the above, will be deemed an Excusable Delay.

The Town reserves the right to rescind or shorten any extension previously granted if subsequently, the Project Manager determines that any information provided by the Contractor in support of a request for an extension of time was erroneous; provided however, that such information or facts, if known, would have resulted in a denial of the request for an Excusable Delay. Notwithstanding the above, the Project Manager will not rescind or shorten any extension previously granted if the Contractor acted in reliance upon the granting of such extension and such extension was based on information which, although later found to have been erroneous, was submitted in good faith by the Contractor.

The request for an Excusable Delay must be made within five (5) calendar days after the time when the Contractor knows or should have known of any cause for a specific event, for which it may claim an extension of time and must provide any actual or potential basis for an extension of time,

identifying such causes and describing, as fully as practicable at that time, the nature and expected duration of the delay and its effect on the completion of that part of the Work identified in the request. The Project Manager may require the Contractor to furnish such additional information or documentation, as the Project Manager will reasonably deem necessary or helpful in considering the requested extension.

The Contractor will not be entitled to an extension of time unless the Contractor affirmatively demonstrates that it is entitled to such extension.

The Project Manager will endeavor to review and respond to the Contractor's request for Excusable Delays in a reasonable period of time; however, the Contractor is obligated to continue to perform the Work required regardless of whether the Project Manager has issued a decision or whether the Contractor agrees or disagrees with that decision.

With regard to an injunction, strike or interference of public origin which may delay the Project, the Contractor must promptly give the Project Manager a copy of the injunction or other orders and copies of the papers upon which the same was granted. The Town must be afforded the right to intervene and become a party to any suit or proceeding in which any such injunction has been obtained and move to dissolve the same or otherwise, as the Town may deem proper.

Where the Contractor is delayed for any period of time by two or more of the causes mentioned in Article C4.04, Excusable Delay, Non-Compensable, the Contractor will not be entitled to a separate extension for each one of the causes, only one period of extension will be granted for the delay.

Any extension of time granted by the Town will be processed through the Change Order provisions of the Contract.

The permitting of the Contractor to proceed with the Work subsequent to the date specified in the Contract (as such date may have been extended by a change order), the making of any payment to the Contractor, the issuance of any Change Order, will not waive the Town's rights under the Contract, including but not limited to the assessment of liquidated damages or declaring Contractor in default.

#### C4.04 EXCUSABLE DELAY, NON-COMPENSABLE

Excusable Delay is delay caused by either of the following: (i) circumstances that could not be foreseen and are beyond the reasonable control of Contractor, its subcontractors, or suppliers; or (ii) joint or concurrent action by Contractor, its subcontractors, suppliers or vendors and the Town. Then Contractor will be entitled only to a time extension and no compensation for the delay.

Contractor is entitled to a time extension of the Contract time for each day the Work is delayed due to Excusable Delay. Contractor must document its claim for any time extension as provided in Article C4.05.

Failure of Contractor to comply with Article C4.05, as to any particular event of delay will be deemed conclusively to constitute a waiver, abandonment or relinquishment of any and all claims resulting from that particular event of delay.

#### C4.05 CLAIMS

Contractor will only be entitled to submit a claim after submitting its request for additional compensation or time in accordance with Articles C4.03 and C4.04 of the Contract and the request(s) have been denied or the Contractor does not agree with the decision of the Town.

Any claim for a change in the Contract time for completion of any Work, the Contract Term, or Contract price must be made by written notice by Contractor to the Town representatives identified in Article C1.28 within the timeframe established in Article C4.04, effective with the commencement of the event giving rise to the claim stating the general nature and cause of the claim. Thereafter, within twenty (20) calendar days of the termination of the event giving rise to the claim, written notice of the extent of the claim with supporting information and documentation must be provided unless the Procurement Manager allows an additional period of time to ascertain more accurate data in support of the claim. The written notice must be accompanied by Contractor's written notarized statement that the adjustment(s) claimed is the entire adjustment to which the Contractor has reason to believe it is entitled as a result of the Contract. It is expressly and specifically agreed that any and all claims for changes to the Contract will be waived if not submitted in strict accordance with the requirements of this Article.

The Town may require the Contract to submit its claim utilizing a specific format or forms to facilitate the Town's evaluation of the claim. The Town at its sole discretion may require that additional documentation or information be provided by the Contractor to assist in its review and evaluation of the claim.

The Contract time will be extended in an amount equal to time lost on critical Work items due to delays beyond the control of and through no fault or negligence of Contractor if a claim is made as provided in this Article. Such delays include, but are not be limited to, acts or neglect by any separate contractor employed by Town, fires, floods, labor disputes beyond the control of the Contractor, epidemics, abnormal weather conditions (if applicable), or acts of God.

The Contractor will not be entitled to an increase in the Contract price or payment or compensation of any kind from the Town for direct, indirect, consequential, impact or other costs, expenses or damages, including but not limited to costs of acceleration or inefficiency, arising because of delay, disruption, interference or hindrance from any cause whatsoever, whether such delay, disruption, interference or hindrance be it reasonable or unreasonable, foreseeable or unforeseeable, avoidable or unavoidable. Contractor will only be entitled to an extension of the Contract Time for completion of the Work, as the sole and exclusive remedy for such resulting excusable delay.

The Contractor agrees to make no claim for damages for delay of any kind in the performance of the Contract Documents whether occasioned by any act or omission of the Town or any of its representatives and the Contractor agrees that any such claim will be compensated solely by an extension of time to complete performance of the Work due to an Excusable Delay as defined in Articles C4.03, and Article C4.04. The Contractor alone specifically assumes the risk of such delays, including, without limitation: delays in processing or approving any submittals to the Town or by the Town, or the failure to render determinations, approvals, replies, inspections, in a timely manner. Contractor will not receive monetary compensation for Town delay(s).

Failure of Contractor to comply with this Article as to any particular event of claim will be deemed conclusively to constitute a waiver of any and all claims resulting from that particular event.

#### C4.06 CONTINUING THE WORK

Contractor must continue to perform all Work under the Contract Documents during all disputes or disagreements with Town, including disputes or disagreements concerning a request for a Change Order and no Work must not be delayed or postponed pending resolution of any disputes or disagreements.

# C4.07 FRAUD AND MISREPRESENTATION

The Town may terminate this Contract or any other contracts with the Town with any person, individual, corporation, entity, or affiliate that attempts to meet its contractual obligations with the Town through fraud, misrepresentation or material misstatement. Such person, individual, corporation, entity, or affiliate will be responsible for all direct or indirect costs associated with termination or cancellation.

#### C4.08 STOP WORK ORDER

The Town may, at any time, by written order to the Contractor, require the Contractor to stop all, or any part, of the Work for a period of up to ninety (90) days (or any lesser period), commencing no sooner than the date the order is delivered to the Contractor, and for any further period to which the parties may agree. Any such order will be specifically identified as a "Stop Work Order" issued pursuant to this paragraph. Within the period of ninety (90) days (or the lesser period specified) after a Stop Work Order is delivered to the Contractor, or within any extension to which the parties have agreed the Town will either:

- 1. Cancel the Stop Work Order; or
- 2. Terminate the Work covered by such order as provided in Article C5.03, Termination for Convenience.

If a Stop Work Order issued under this Article is canceled or the period of the order or any extension thereof expires, the Contractor must resume the Work without compensation to the Contractor for such suspension other than extending the time to complete any Work under the Contract or extending the Contract Term to the extent that, in the opinion of the Project Manager, the Contractor may have been delayed by such suspension. In the event the Project Manager determines that the suspension of Work was necessary due to Contractor's defective or incorrect Work, unsafe Work conditions caused by the Contractor, or any other reason caused by Contractor's fault or omission, the Contractor will not be entitled to an extension of time or Contract Term or (Time) as a result of the issuance of a Stop Work Order.

Suspension of the Work caused by a threatened or actual storm event, regardless of whether the Town has directed such suspension, will entitle the Contractor to additional Contract time as non-compensable, Excusable Delay, and will not give rise to a claim for compensable delay.

#### C4.09 MATERIALITY AND WAIVER OF BREACH

Town and Contractor agree that each requirement, duty, and obligation set forth in the Contract Documents is substantial and important to the formation of the Contract Documents and, therefore, is a material term hereof. The Town's failure to enforce any provision of the Contract Documents will not be deemed a waiver of such provision or modification of the Contract Documents. A waiver of any breach of a provision of the Contract Documents will not be deemed a waiver of any subsequent breach and will not be construed to be a modification of the terms of the Contract Documents.

#### C4.10 TIME IN WHICH TO BRING ACTION AGAINST THE TOWN

In the event the Contractor may be deemed to have a cause of action against the Town, no action will lie or be maintained by the Contractor against the Town upon any claim arising out of or based upon the Contract Documents by reason of any act or omission or requirement of the Town or its agents, unless such action is commenced within six (6) months after the date of issuance of a final payment under the Contract, or if the Contract is terminated under the provisions of the Contract, unless such action is commenced within six (6) months after the date of such termination by the Town.

## C5.03 TERMINATION FOR CONVENIENCE

In addition to cancellation or termination as otherwise provided for in the Contract, the Town may at any time, in its sole discretion, with or without cause, terminate the Contract by written notice to the Contractor. In no event, will any payments under this Paragraph exceed the maximum cost set forth in the Contract and the amount due hereunder may be offset by payments made to the Contractor or any claims made against the Contractor. Contractor will not be entitled to lost profits, overhead or consequential damages as a result of a Termination for Convenience.

#### C5.04 REMEDIES AVAILABLE TO THE TOWN

The Town may avail itself of each and every remedy stated in the Contract Documents or existing at law or in equity. The exercise or the beginning of the exercise, of one remedy will not be deemed a waiver of the right to exercise, at the same time or thereafter, of any other remedy.

## C4 CONTRACT MODIFICATION AND DISPUTE PROCESS

#### C4.01 CHANGE ORDERS

Without invalidating the Contract Documents, and without notice to any Surety, the Town reserves the right to make increases, decreases or other changes in the character or quantity of the Work under the Contract Documents as may be considered necessary or desirable to complete the Work in a manner satisfactory to the Town. The Town reserves the right to order changes which may result in additions to or reductions from the amount, type or value of the Work shown in the Contract, and which are within the general scope of the Contract Documents, and all such changes will be authorized only by a Change Order approved in advance, and issued in accordance with provisions of the Town.

The Contractor is required to provide the Project Manager with a detailed Change Proposal Request ("CPR") or Request for Change Order ("RCO"), utilizing the Town's standard form, which must include requested revisions to the Contract, including but not limited to adjustments in this Contract Price and Contract Time. The Contractor is required to provide sufficient data in support of the cost proposal demonstrating its reasonableness. In furtherance of this obligation, the Town may require that the Contractor submit any or all of the following: a cost breakdown of material costs, labor costs, labor rates by trade, and Work classification and overhead rates in support of Contractor's CPR/RCO. The Contractor's CPR/RCO must include any schedule revisions and an explanation of the cost and schedule impact of the proposed change on the Project. If the Contractor fails to notify the Project Manager of any schedule changes associated

with the proposed charge, at Winste and Recyclinge Services LLG address by Contractor that the proposed work will not have any scheduling consequences.

Any changes to the Contract must be contained in a written Change order, using the Town's Change Order Form, executed by the both parties. However, under circumstances determined necessary by the Town, a Change Order may be issued unilaterally by Town.

In the event a satisfactory adjustment cannot be reached and a Change Order has not been issued or time is of the essence, the Town reserves the right, at its sole option to direct the Contractor to proceed on a time and materials basis or make such arrangements as may be deemed necessary to complete the proposed additional Work.

Where the Town directs the Contractor to proceed on a time and materials basis, Contractor must maintain detailed records of all labor and material costs for review by the Town.

For all Change Orders the Contractor will be entitled to a combined profit and overhead rate for Change Orders that will not be in excess of ten (10%) percent inclusive of all direct/indirect costs including labor, material, and equipment costs, unless the Procurement Manager determines that the complexity and risk of the Change Order work is such that an additional factor is appropriate.

The final amount to be paid to the Contractor for Change Order Work is subject to negotiation between the Town and the Contractor.

Failure by the Contractor to proceed with Change Order Work when so directed by the Town Manager or designee may result in the Contractor being found in default of the Contract.

Contractor must utilize the Town's standard requests for change orders and change order forms unless otherwise specifically approved by the Town's Procurement Manager. The Town's Forms are available on the Town's website.

#### C4.02 FORCE MAJEURE

Should any failure to perform on the part of Contractor be due to a condition of Force Majeure as that term is interpreted under Florida law, then, the Town may allow an extension of time reasonably commensurate with the cause of such failure to perform or cure.

If the Contractor is delayed in performing any obligation under the Contract Documents due to a force majeure condition, the Contractor must request a time extension from the Town within two (2) working days of said Force Majeure occurrence. Any time extension will be subject to mutual agreement and will not be cause for any claim by the Contractor for extra compensation unless additional services are required by the Town. A Force Majeure event **does not include** inclement weather except for significant weather events that adversely impact the critical path of the Project Schedule, if required, or completion of the work, and **does not include** the acts or omissions of Subcontractors or suppliers.

#### C4.03 EXTENSION OF TIME

Any reference in this Article to the Contractor will be deemed to include suppliers, and permitted Subcontractors, whether or not in privity of contract with the Contractor for the purpose of this Article.

If the Contractor is delayed at any time during the progress of the Work beyond the time frame or date provided for Final Completion by the neglect or failure of the Town or by a Force Majeure, then the Contract Time set forth in the Contract will be extended by the Town subject to the following conditions:

1. The cause of the delay arises after issuance of the NTP and could not have been anticipated by the Contractor by reasonable investigation before proceeding with the Work;

- 2. The Contractor definition and Recycling Services of the Work will be actually and necessarily delayed;
- 3. The effect of such cause cannot be avoided or mitigated by the exercise of all reasonable precautions, efforts and measures whether before or after the occurrence of the cause of delay.

A delay meeting all the conditions of the above, will be deemed an Excusable Delay.

The Town reserves the right to rescind or shorten any extension previously granted if subsequently, the Project Manager determines that any information provided by the Contractor in support of a request for an extension of time was erroneous; provided however, that such information or facts, if known, would have resulted in a denial of the request for an Excusable Delay. Notwithstanding the above, the Project Manager will not rescind or shorten any extension previously granted if the Contractor acted in reliance upon the granting of such extension and such extension was based on information which, although later found to have been erroneous, was submitted in good faith by the Contractor.

The request for an Excusable Delay must be made within five (5) calendar days after the time when the Contractor knows or should have known of any cause for a specific event, for which it may claim an extension of time and must provide any actual or potential basis for an extension of time, identifying such causes and describing, as fully as practicable at that time, the nature and expected duration of the delay and its effect on the completion of that part of the Work identified in the request. The Project Manager may require the Contractor to furnish such additional information or documentation, as the Project Manager will reasonably deem necessary or helpful in considering the requested extension.

The Contractor will not be entitled to an extension of time unless the Contractor affirmatively demonstrates that it is entitled to such extension.

The Project Manager will endeavor to review and respond to the Contractor's request for Excusable Delays in a reasonable period of time; however, the Contractor is obligated to continue to perform the Work required regardless of whether the Project Manager has issued a decision or whether the Contractor agrees or disagrees with that decision.

With regard to an injunction, strike or interference of public origin which may delay the Project, the Contractor must promptly give the Project Manager a copy of the injunction or other orders and copies of the papers upon which the same was granted. The Town must be afforded the right to intervene and become a party to any suit or proceeding in which any such injunction has been obtained and move to dissolve the same or otherwise, as the Town may deem proper.

Where the Contractor is delayed for any period of time by two or more of the causes mentioned in Article C4.04, Excusable Delay, Non-Compensable, the Contractor will not be entitled to a separate extension for each one of the causes, only one period of extension will be granted for the delay.

Any extension of time granted by the Town will be processed through the Change Order provisions of the Contract.

The permitting of the Contractor to proceed with the Work subsequent to the date specified in the Contract (as such date may have been extended by a change order), the making of any payment to the Contractor, the issuance of any Change Order, will not waive the Town's rights under the Contract, including but not limited to the assessment of liquidated damages or declaring Contractor in default.

# C4.04 EXCUSABLE DELAY, NON-COMPLY STBLE ARCycling Services LLC.

Excusable Delay is delay caused by either of the following: (i) circumstances that could not be foreseen and are beyond the reasonable control of Contractor, its subcontractors, or suppliers; or (ii) joint or concurrent action by Contractor, its subcontractors, suppliers or vendors and the Town. Then Contractor will be entitled only to a time extension and no compensation for the delay.

Contractor is entitled to a time extension of the Contract time for each day the Work is delayed due to Excusable Delay. Contractor must document its claim for any time extension as provided in Article C4.05.

Failure of Contractor to comply with Article C4.05, as to any particular event of delay will be deemed conclusively to constitute a waiver, abandonment or relinquishment of any and all claims resulting from that particular event of delay.

#### C4.05 CLAIMS

Contractor will only be entitled to submit a claim after submitting its request for additional compensation or time in accordance with Articles C4.03 and C4.04 of the Contract and the request(s) have been denied or the Contractor does not agree with the decision of the Town.

Any claim for a change in the Contract time for completion of any Work, the Contract Term, or Contract price must be made by written notice by Contractor to the Town representatives identified in Article C1.28 within the timeframe established in Article C4.04, effective with the commencement of the event giving rise to the claim stating the general nature and cause of the claim. Thereafter, within twenty (20) calendar days of the termination of the event giving rise to the claim, written notice of the extent of the claim with supporting information and documentation must be provided unless the Procurement Manager allows an additional period of time to ascertain more accurate data in support of the claim. The written notice must be accompanied by Contractor's written notarized statement that the adjustment(s) claimed is the entire adjustment to which the Contractor has reason to believe it is entitled as a result of the Contract. It is expressly and specifically agreed that any and all claims for changes to the Contract will be waived if not submitted in strict accordance with the requirements of this Article.

The Town may require the Contract to submit its claim utilizing a specific format or forms to facilitate the Town's evaluation of the claim. The Town at its sole discretion may require that additional documentation or information be provided by the Contractor to assist in its review and evaluation of the claim.

The Contract time will be extended in an amount equal to time lost on critical Work items due to delays beyond the control of and through no fault or negligence of Contractor if a claim is made as provided in this Article. Such delays include, but are not be limited to, acts or neglect by any separate contractor employed by Town, fires, floods, labor disputes beyond the control of the Contractor, epidemics, abnormal weather conditions (if applicable), or acts of God.

The Contractor will not be entitled to an increase in the Contract price or payment or compensation of any kind from the Town for direct, indirect, consequential, impact or other costs, expenses or damages, including but not limited to costs of acceleration or inefficiency, arising because of delay, disruption, interference or hindrance from any cause whatsoever, whether such delay, disruption, interference or hindrance be it reasonable or unreasonable, foreseeable or unforeseeable, avoidable or unavoidable. Contractor will only be entitled to an extension of the Contract Time for completion of the Work, as the sole and exclusive remedy for such resulting excusable delay.

The Contractor agrees to make no claim for the performance of the Contract Documents whether occasioned by any act or omission of the Town or any of its representatives and the Contractor agrees that any such claim will be compensated solely by an extension of time to complete performance of the Work due to an Excusable Delay as defined in Articles C4.03, and Article C4.04. The Contractor alone specifically assumes the risk of such delays, including, without limitation: delays in processing or approving any submittals to the Town or by the Town, or the failure to render determinations, approvals, replies, inspections, in a timely manner. Contractor will not receive monetary compensation for Town delay(s).

Failure of Contractor to comply with this Article as to any particular event of claim will be deemed conclusively to constitute a waiver of any and all claims resulting from that particular event.

Thank you for your recent General Hauler Permit application. **Great Waste and Recycling Services, LLC** (Permit **#16093**) has been approved through **June 31, 2020** to transport solid waste in Miami-Dade County.

Enclosed you will find (26) decals, (GH20-0916:0941) for the vehicles approved under this permit account to transport solid waste in Miami-Dade County under this permit account.

Each decals should be permanently affixed on the inside windshield of the vehicles. Any vehicles observed transporting without a decal permanently affixed to the windshield are considered to be in violation as prescribed in Chapter 15-17 of the Code of Miami-Dade County.

Please note that the Department of Solid Waste Management (DSWM) has the authority at any time, to request an accounting of the following.

- A summary of the number of tons of solid waste collected quarterly based on schedule service, as of the reporting date.
- A summary of the number of tons of recyclable material collected and marketed quarterly, on a schedule and format prescribed by the department.

You are advised to maintain accurate records in the event such a request is made. It is also recommended that you keep this document on file as proof of your General Hauler Permit approval

In addition, General Haulers with solid waste accounts in unincorporated Miami-Dade County must report and pay on a monthly basis, a disposal facility fee on all accounts except recycling pickup or non-reoccurring C & D pickups.

Should you require additional information specific to your permit, contact the Permit Section at 305-514-6610. If you need assistance with the requirements of the Disposal Facility Fee, contact Xavier Peresrego at 305-514-6763.

Sincerely,

Letter of Recommendation for Mr. Carlo Piccinonna and Great Waste

To Whom It May Concern:

I have known Mr. Carlo Piccinonna since April 2008 when he assumed the leadership of Choice Environmental Services to manage operations during the period of contract (July 2005 — June 2010) with Miami-Dade County Public Schools for providing recycling and solid waste services to over 350 schools and facilities. And now under our present contract with Great Waste providing daily solid waste services to over 180 locations.

As with the old contract and with the present contract, Mr. Piccinonna has always strived to provide the best service possible as enforced by the fact that my office has not received one complaint about service since Great Waste started in January 2017. Also, after Hurricane Irma last year, Great Waste was instrumental in our overall effort to restore our schools to normalcy in providing expedient service beyond measure.

In my 30 years of overseeing the solid waste services contracts for Miami-Dade County Public Schools I have interacted with some of the top 5 waste companies in America and none of them can compare with the leadership and level of service that Mr. Piccinonna and Great Waste are providing now.

I am confident that Mr. Piccinonna and Great Waste will meet and exceed any requirement.

If you require additional information, please do not hesitate to contact me.

Sincerely,

## Town of Miami Lakes Memorandum

То:	Honorable Mayor & Councilmembers
From:	Edward Pidermann, Town Manager
Subject:	Award of a Contract for Miscellaneous Drainage and Roadway Services ITB No. 2020-04
Date:	December 10, 2019

## **Recommendation:**

It is recommended that the Town Manager award contracts to National Concrete and Paving, LLC ("National Concrete"), the lowest responsive and responsible bidder, to act as the primary contractor, and GPE Engineering & General Contractor Corp ("GPE"), the second lowest responsive bidder, to act as the secondary contractor in the event National Concrete is non-responsive or unable to perform for ITB 2020-04, Miscellaneous Drainage and Roadway Services in amounts not to exceed budgeted funds. This contract will be for an initial term of three (3) years with two (2) one-year options to renew.

## **Background**

The Town issued ITB 2020-04 for Miscellaneous Drainage and Roadway Services on Friday, October 18, 2019. The ITB was advertised in the Miami Daily Business Review, posted to DemandStar, Public Purchase, and posted in the Government Center Lobby.

To qualify for award, prospective Bidders were required to:

- 1. Possess a minimum of five (5) years of experience performing miscellaneous roadway and/or drainage projects;
- 2. Have completed at least five (5) projects of similar size, scope and complexity performed within the last three (3) years;
- 3. Possess a valid General Contractor or General Engineering Contractor license from the State of Florida, a Certificate of Competency from the Miami-Dade County's Construction Trades Qualifying Board as a General Engineering Contractor or as a Specialty Engineering Contractor;
- 4. Must self-perform thirty percent (30%) of multiple trade work; and
- 5. Provide at least three (3) verifiable client references.

On the date of the bid opening, November 15, 2019, we received seven (7) bids from the following Bidders:

- 1. Florida Blacktop, Inc. \$701,472.69
- 2. GPE Engineering & General Contractor Corp ("GPE")- \$429,906.10
- 3. M&M Asphalt Maintenance, Inc. ("M&M")- \$1,648,478.48
- 4. Maestre Construction, Inc. ("Maestre")- \$774,896.40
- 5. Metro Express, Inc. ("Metro")- \$541,640
- 6. National Concrete and Paving, LLC ("National Concrete")- \$399,955.50
- 7. Southeastern Engineering Contractors, Inc. ("Southeastern") \$563,049.50

Procurement performed a due diligence review of the bids for responsiveness and found that both National Concrete and GPE met all the minimum requirements within the solicitation. Both submittals were complete and included all the necessary supporting documentation. Furthermore, the submittals met the minimum qualifications and Procurement did not find any significant issues had come up in their past performance that would indicate National Concrete or GPE was incapable of performing the Work.

National Concrete and GPE have been in business for five (5) years and 40 years respectively, provided three (3) positive client references and five (5) projects of similar size, scope and complexity within the last five (5) years, and are both able to self-perform at least thirty percent (30%) of the Work. Based on my review of the bid submittals, Procurement recommends awarding contracts to National Concrete to act as the primary contract. and GPE to act as the secondary contract.

#### C4 CONTRACT MODIFICATION AND DISPUTE PROCESS

#### C4.01 CHANGE ORDERS

Without invalidating the Contract Documents, and without notice to any Surety, the Town reserves the right to make increases, decreases or other changes in the character or quantity of the Work under the Contract Documents as may be considered necessary or desirable to complete the Work in a manner satisfactory to the Town. The Town reserves the right to order changes which may result in additions to or reductions from the amount, type or value of the Work shown in the Contract, and which are within the general scope of the Contract Documents, and all such changes will be authorized only by a Change Order approved in advance, and issued in accordance with provisions of the Town.

The Contractor is required to provide the Project Manager with a detailed Change Proposal Request ("CPR") or Request for Change Order ("RCO"), utilizing the Town's standard form, which must include requested revisions to the Contract, including but not limited to adjustments in this Contract Price and Contract Time. The Contractor is required to provide sufficient data in support of the cost proposal demonstrating its reasonableness. In furtherance of this obligation, the Town may require that the Contractor submit any or all of the following: a cost breakdown of material costs, labor costs, labor rates by trade, and Work classification and overhead rates in support of Contractor's CPR/RCO. The Contractor's CPR/RCO must include any schedule revisions and an explanation of the cost and schedule impact of the proposed change on the Project. If the Contractor fails to notify the Project Manager of any schedule changes associated with the proposed change, it will be deemed to be an acknowledgment by Contractor that the proposed work will not have any scheduling consequences.

Any changes to the Contract must be contained in a written Change order, using the Town's Change Order Form, executed by the both parties. However, under circumstances determined necessary by the Town, a Change Order may be issued unilaterally by Town.

In the event a satisfactory adjustment cannot be reached and a Change Order has not been issued or time is of the essence, the Town reserves the right, at its sole option to direct the Contractor to proceed on a time and materials basis or make such arrangements as may be deemed necessary to complete the proposed additional Work.

Where the Town directs the Contractor to proceed on a time and materials basis, Contractor must maintain detailed records of all labor and material costs for review by the Town.

For all Change Orders the Contractor will be entitled to a combined profit and overhead rate for Change Orders that will not be in excess of ten (10%) percent inclusive of all direct/indirect costs including labor, material, and equipment costs, unless the Procurement Manager determines that the complexity and risk of the Change Order work is such that an additional factor is appropriate.

The final amount to be paid to the Contractor for Change Order Work is subject to negotiation between the Town and the Contractor.

Failure by the Contractor to proceed with Change Order Work when so directed by the Town Manager or designee may result in the Contractor being found in default of the Contract.

Contractor must utilize the Town's standard requests for change orders and change order forms unless otherwise specifically approved by the Town's Procurement Manager. The Town's Forms are available on the Town's website.

#### C4.02 FORCE MAJEURE

Should any failure to perform on the part of Contractor be due to a condition of Force Majeure as that term is interpreted under Florida law, then, the Town may allow an extension of time reasonably commensurate with the cause of such failure to perform or cure.

If the Contractor is delayed in performing any obligation under the Contract Documents due to a force majeure condition, the Contractor must request a time extension from the Town within two (2) working days of said Force Majeure occurrence. Any time extension will be subject to mutual agreement and will not be cause for any claim by the Contractor for extra compensation unless additional services are required by the Town. A Force Majeure event **does not include** inclement weather except for significant weather events that adversely impact the critical path of the Project Schedule, if required, or completion of the work, and **does not include** the acts or omissions of Subcontractors or suppliers.

#### C4.03 EXTENSION OF TIME

Any reference in this Section to the Contractor will be deemed to include suppliers, and permitted Subcontractors, whether or not in privity of contract with the Contractor for the purpose of this Section.

If the Contractor is delayed at any time during the progress of the Work beyond the time frame or date provided for Final Completion by the neglect or failure of the Town or by a Force Majeure, then the Contract Time set forth in the Contract will be extended by the Town subject to the following conditions:

- 1. The cause of the delay arises after issuance of the NTP and could not have been anticipated by the Contractor by reasonable investigation before proceeding with the Work;
- 2. The Contractor demonstrates that the completion of the Work will be actually and necessarily delayed;
- 3. The effect of such cause cannot be avoided or mitigated by the exercise of all reasonable precautions, efforts and measures whether before or after the occurrence of the cause of delay.

A delay meeting all the conditions of the above, will be deemed an Excusable Delay.

The Town reserves the right to rescind or shorten any extension previously granted if subsequently, the Project Manager determines that any information provided by the Contractor in support of a request for an extension of time was erroneous; provided however, that such information or facts, if known,

would have resulted in a denial of the request for an Excusable Delay. Notwithstanding the above, the Project Manager will not rescind or shorten any extension previously granted if the Contractor acted in reliance upon the granting of such extension and such extension was based on information which, although later found to have been erroneous, was submitted in good faith by the Contractor.

The request for an Excusable Delay must be made within five (5) calendar days after the time when the Contractor knows or should have known of any cause for a specific event, for which it may claim an extension of time and must provide any actual or potential basis for an extension of time, identifying such causes and describing, as fully as practicable at that time, the nature and expected duration of the delay and its effect on the completion of that part of the Work identified in the request. The Project Manager may require the Contractor to furnish such additional information or documentation, as the Project Manager will reasonably deem necessary or helpful in considering the requested extension.

The Contractor will not be entitled to an extension of time unless the Contractor affirmatively demonstrates that it is entitled to such extension.

The Project Manager will endeavor to review and respond to the Contractor's request for Excusable Delays in a reasonable period of time; however, the Contractor is obligated to continue to perform the Work required regardless of whether the Project Manager has issued a decision or whether the Contractor agrees or disagrees with that decision.

With regard to an injunction, strike or interference of public origin which may delay the Project, the Contractor must promptly give the Project Manager a copy of the injunction or other orders and copies of the papers upon which the same was granted. The Town must be afforded the right to intervene and become a party to any suit or proceeding in which any such injunction has been obtained and move to dissolve the same or otherwise, as the Town may deem proper.

Where the Contractor is delayed for any period of time by two or more of the causes mentioned in Section C4.04, Excusable Delay, Non-Compensable, the Contractor will not be entitled to a separate extension for each one of the causes, only one period of extension will be granted for the delay.

Any extension of time granted by the Town will be processed through the Change Order provisions of the Contract.

The permitting of the Contractor to proceed with the Work subsequent to the date specified in the Contract (as such date may have been extended by a change order), the making of any payment to the Contractor, the issuance of any Change Order, will not waive the Town's rights under the Contract, including but not limited to the assessment of liquidated damages or declaring Contractor in default.

#### C4.04 EXCUSABLE DELAY, NON-COMPENSABLE

Excusable Delay is delay caused by either of the following: (i) circumstances that could not be foreseen and are beyond the reasonable control of Contractor, its subcontractors, or suppliers; or (ii) joint or concurrent action by Contractor, its subcontractors, suppliers or vendors and the Town. Then Contractor will be entitled only to a time extension and no compensation for the delay.

Contractor is entitled to a time extension of the Contract time for each day the Work is delayed due to Excusable Delay. Contractor must document its claim for any time extension as provided in Section C4.05.

Failure of Contractor to comply with Section C4.05, as to any particular event of delay will be deemed conclusively to constitute a waiver, abandonment or relinquishment of any and all claims resulting from that particular event of delay.

#### C4.05 CLAIMS

Contractor will only be entitled to submit a claim after submitting its request for additional compensation or time in accordance with Sections C4.03 and C4.04 of the Contract and the request(s) have been denied or the Contractor does not agree with the decision of the Town.

Any claim for a change in the Contract time for completion of any Work, the Contract Term, or Contract price must be made by written notice by Contractor to the Town representatives identified in Section C1.26 within the timeframe established in Section C4.04, effective with the commencement of the event giving rise to the claim stating the general nature and cause of the claim. Thereafter, within twenty (20) calendar days of the termination of the event giving rise to the claim, written notice of the extent of the claim with supporting information and documentation must be provided unless the Procurement Manager allows an additional period of time to ascertain more accurate data in support of the claim. The written notice must be accompanied by Contractor's written notarized statement that the adjustment(s) claimed is the entire adjustment to which the Contractor has reason to believe it is entitled as a result of the occurrence of said event. All claims and disputes will be determined in accordance with the Contract. It is expressly and specifically agreed that any and all claims for changes to the Contract will be waived if not submitted in strict accordance with the requirements of this Section.

The Town may require the Contract to submit its claim utilizing a specific format or forms to facilitate the Town's evaluation of the claim. The Town at its sole discretion may require that additional documentation or information be provided by the Contractor to assist in its review and evaluation of the claim.

The Contract time will be extended in an amount equal to time lost on critical Work items due to delays beyond the control of and through no fault or negligence of Contractor if a claim is made as provided in this Section. Such delays include, but are not be limited to, acts or neglect by any separate contractor employed by Town, fires, floods, labor disputes beyond the control of the Contractor, epidemics, abnormal weather conditions (if applicable), or acts of God.

The Contractor will not be entitled to an increase in the Contract price or payment or compensation of any kind from the Town for direct, indirect, consequential, impact or other costs, expenses or damages, including but not limited to costs of acceleration or inefficiency, arising because of delay, disruption, interference or hindrance from any cause whatsoever, whether such delay, disruption, interference or hindrance be it reasonable or unreasonable, foreseeable or unforeseeable, avoidable or unavoidable. Contractor will only be entitled to an extension of the Contract Time for completion of the Work, as the sole and exclusive remedy for such resulting excusable delay.

The Contractor agrees to make no claim for damages for delay of any kind in the performance of the Contract Documents whether occasioned by any act or omission of the Town or any of its representatives and the Contractor agrees that any such claim will be compensated solely by an extension of time to complete performance of the Work due to an Excusable Delay as defined in Section C4.03, and Section C4.04. The Contractor alone specifically assumes the risk of such delays, including, without limitation: delays in processing or approving any submittals to the Town or by the Town, or the failure to render determinations, approvals, replies, inspections, in a timely manner. Contractor will not receive monetary compensation for Town delay(s).

Failure of Contractor to comply with this Section as to any particular event of claim will be deemed conclusively to constitute a waiver of any and all claims resulting from that particular event.

#### C4.06 CONTINUING THE WORK

Contractor must continue to perform all Work under the Contract Documents during all disputes or disagreements with Town, including disputes or disagreements concerning a request for a Change Order and no Work must not be delayed or postponed pending resolution of any disputes or disagreements.

#### C4.07 FRAUD AND MISREPRESENTATION

The Town may terminate this Contract or any other contracts with the Town with any person, individual, corporation, entity, or affiliate that attempts to meet its contractual obligations with the Town through fraud, misrepresentation or material misstatement. Such person, individual, corporation, entity, or affiliate will be responsible for all direct or indirect costs associated with termination or cancellation.

#### C4.08 STOP WORK ORDER

The Town may, at any time, by written order to the Contractor, require the Contractor to stop all, or any part, of the Work for a period of up to ninety (90) days (or any lesser period), commencing no sooner than the date the order is delivered to the Contractor, and for any further period to which the parties may agree. Any such order will be specifically identified as a "Stop Work Order" issued pursuant to this paragraph. Within the period of ninety (90) days (or the lesser period specified) after a Stop Work Order is delivered to the Contractor, or within any extension to which the parties have agreed the Town will either:

- 1. Cancel the Stop Work Order; or
- 2. Terminate the Work covered by such order as provided in Section C5.03, Termination for Convenience.

If a Stop Work Order issued under this Section is canceled or the period of the order or any extension thereof expires, the Contractor must resume the Work without compensation to the Contractor for such suspension other than extending the time to complete any Work under the Contract or extending the Contract Term to the extent that, in the opinion of the Project Manager, the Contractor may have been delayed by such suspension. In the event the Project Manager determines that the suspension of Work was necessary due to Contractor's defective or incorrect Work, unsafe Work conditions caused by the Contractor, or any other reason caused by Contractor's fault or omission, the Contractor will not be entitled to an extension of time or Contract Term or (Time) as a result of the issuance of a Stop Work Order.

Suspension of the Work caused by a threatened or actual storm event, regardless of whether the Town has directed such suspension, will entitle the Contractor to additional Contract time as non-compensable, Excusable Delay, and will not give rise to a claim for compensable delay.

#### C4.09 MATERIALITY AND WAIVER OF BREACH

Town and Contractor agree that each requirement, duty, and obligation set forth in the Contract Documents is substantial and important to the formation of the Contract Documents and, therefore, is a material term hereof. The Town's failure to enforce any provision of the Contract Documents will not be deemed a waiver of such provision or modification of the Contract Documents. A waiver of any breach of a provision of the Contract Documents will not be deemed a waiver of any subsequent breach and will not be construed to be a modification of the terms of the Contract Documents.

#### C4.10 TIME IN WHICH TO BRING ACTION AGAINST THE TOWN

#### **D4 ADDITIONAL LINE ITEM QUANITITES**

The Town reserves the right to request price quotes for additional items not contained in the initial award. Should the Town add any additional line items the Town will do so through the Change Order process.

#### **D5 CONTRACT TERM/ESTIMATED EXPENDITURE**

Contractor must use the Town's Standard Invoice Form ("Invoice") for all payment requests. The invoice must include the Work Order numbers to be paid as well as the amount to be paid for each Work Order. Failure to include the above information will delay payment. Payments will not be made based on statements of accounts.

The Invoice Form is available on the Town's website at <u>http://www.miamilakes-fl.gov/index.php?option=com\_content&view=article&id=149&itemid=3</u>58.

The Town will take action to pay, reject or make partial payment on an Invoice in accordance with the Florida Local Government Prompt Payment Act. The Contractor will be compensated based on actual Work performed at the unit prices specified in the Contract.

The Town anticipated expenditure for the initial year of the Contract will be approximately \$200,000. The Town anticipates maintaining the same levels of funding for the 2nd & 3rd years, which would result in an anticipated expenditure of \$600,000 during the initial three (3) year contract term.

The stated quantities do not reflect the actual quantities to be ordered and the Town has not established any minimum quantities and no guarantee is expressed or implied as to the total quantity of Work to be issued to a Contractor. The Town reserves the right, at its sole discretion, to make adjustment to the number and/or location of the Bid items. The failure of the Town to order any minimum quantities does not form any basis for a claim by the Contractor for lost work or profits.

#### **D10 LINE ITEM PRICING**

Line item pricing must include all costs, both direct and indirect to perform the Work (including mobilization and MOT), except for those costs specifically identified as reimbursable costs as stated in Section D11. This includes any incidental costs associated with the Work under a Work Order not specifically stated, i.e., the installation of drainage may require backfill and patching, whether permanent or temporary.

The Bid Form contains line item prices and the Bidder is required to Bid on all line items. <u>Where a Bidder fail</u> to provide line item prices for all line items the Bid will be rejected as non-responsive.

Where a permit or the Town requires the Contractor to use a police officer(s) during the performance of the Work the Town will make every effort to furnish police officers at no cost to the Contractor. Where the Town is not able to provide the required police officers the Town will reimburse the Contractor based on the actual cost to the Contractor and the cost is not include in the unit price per item. To be reimbursed the Contractor must submit a copy of documentation substantiating both the cost as well as proof of payment.

Contractor will only be reimbursed for the actual direct cost, without any mark-up.

#### **D12 SPECIFICATIONS**

FDOT specifications apply in the performance of the Work and all applicable specifications are hereby incorporated by reference. The Town may, at its sole discretion, make changes to the FDOT specifications, or add its own specifications, on a Work Order by Work Order basis and the Contractor will be advised of any such changes.

#### **D13 AWARD OF PROJECTS**

Work Orders will be issued to the Town for all Work. A Work Order may consist of one or more Projects. Work Orders will be issued in one of two ways.

Where a Project is based solely on pre-priced line item pricing the Project Manager will calculate the cost of the Project(s) by multiplying the estimated quantities for each line item times the line item price. The Project Manager will then provide the Contractor a written Work Order for a Project(s) and provide it with the spreadsheet used for the calculations (if one is required), the timeframe for completing the Project(s), and available drawings (if any), and any additional contract terms and conditions specific to the Project(s) or the Work Order, including but not limited to additional insurance, liquidated damages, etc.

The Contractor is responsible to visit the site, review any drawings and the spreadsheet, to confirm that the proposed quantities and value stated in the Work Order for the Project(s) is correct. The Contract may request that the Project Manager meet in the field to review the Work Order. If the Contractor believes that that either the quantities, line items, scope or other details are incorrectly stated on the Work Order the Contractor is to notify the Project Manager is writing of their findings within forty-eight (48) hours or the Town will consider the Work Order as accepted by the Contractor. The Project Manager will review any recommended revisions and if necessary, make any revisions. Once revised and forwarded to the Contractor, the Contractor will have twenty-four (24) hours to accept or reject the Work Order. If rejected the Town may have the Work performed by others. Repeated rejections of Work Orders may result in termination of the Contract.

2. If a Project requires work that includes non-pre-priced work, then the Project Manager will request a written Work Order Proposal ("Proposal") from the Contractor. Upon receipt of the Proposal from the Contractor the Project Manager will review the Proposal and either accept, reject or negotiate the Proposal. Once finalized the Project Manager will issue a Work Order for the Work to be performed.

#### D14 LIQUIDATED DAMAGES

The Town may establish liquidated damages on a Work Order by Work Order basis. Where the Town determines that liquidated damages will apply to a Work Order the amount established will be stated in the Work Order.

The Contractor is obligated and guarantees to complete the Work Order in the established in the Work Order or any approved extension of time the Contractor may be granted by the Project Manager. In the event of a delay in completion beyond the date established in the Work Order, the Contractor must pay to the Town for each and every calendar day of unexcused delay, the sum stated in the Work Order, which is hereby agreed upon not as a penalty but as liquidated damages. The Contractor will be notified of any exceptions. The total amount of liquidated damages will not exceed the value of the Work Order.

The Town has the right to deduct liquidated damages assessments from any payment due or which may thereafter become due to the Contractor under any contract the Contractor has with the Town. In case the amount available under contracts the Contractor has with the Town is less than the amount of liquidated damages due the Town, the Contractor must pay the difference upon demand by the Town. Should the Contractor fail to compensate the Town for any liquidated damages, the Town will consider this as a form of indebtedness and may deny any future Work under the Contract or any other Town contract until such indebtedness is paid in full to the Town.

The Town will notify the Contractor in writing that it is incurring liquidated damages.

#### D15 RELEASE OF LIENSSUBCONTRACTOR'S STATEMENT OF SATISFACTION

The Contractor warrants and guarantees that title to all Work, materials and equipment covered by an Invoice, whether incorporated in the Project or not, will pass to the Town upon the receipt of payment by the Contractor, free and clear of all liens, claims, security interests or encumbrances and that no Work, materials or equipment will have been acquired by the Contractor or by any other person performing Work at the site or furnishing materials and equipment for the Project, subject to an agreement under which an interest therein or an encumbrance thereon is retained by the seller or otherwise imposed by the Contractor by a Subcontractor or supplier or any other interested party.

### **D18 REQUEST FOR INFORMATION**

The Contractor must submit a Request for Information ("RFI") where the Contractor believes that the Contract Document's specifications are unclear or conflict. The Contract Documents may supersede the manufacturer's standard warranty. Manufacturer's warranties will become effective upon Final Completion of the Project.

## COMPLIANCE WITH PUBLIC RECORDS LAW

The Town of Miami Lakes shall comply with the Public Records Law as provided by Chapter 119, Florida Statutes, and all applicable amendments. Applicants must invoke the exemptions to disclosure provided by law in the response to the solicitation and must identify the data or other materials to be protected by separate envelope, and must state the reasons why such exclusion from public disclosure is necessary. The submission of a response authorizes release of your firm's credit data to the Town of Miami Lakes.

If the company submits information exempt from public disclosure, the company must identify with specificity which pages/paragraphs of their submittal/proposal package are exempt from the Public Records Act, identifying the specific exemption section that applies to each. The protected information must be submitted to the Town in a separate envelope marked "EXEMPT FROM PUBLIC RECORDS LAW". Failure to identify protected material via a separately marked envelopment will cause the Town to release this information in accordance with the Public Records Law despite any markings on individual pages of your submittal/proposal.

- (a) CONTRACTOR acknowledges TOWN'S obligations under Article 1, Section 24, Florida Constitution and Chapter 119, Florida Statues, to release public records to members of the public upon request. CONTRACTOR acknowledges that TOWN is required to comply with Article 1, Section 24, Florida Constitution and Chapter 119, Florida Statutes, in the handling of the materials created under this Agreement and that said statute controls over the terms of this Agreement.
- (b) CONTRACTOR specifically acknowledges its obligations to comply with Section 119.0701, Florida Statutes, with regard to public records, and shall:
  - 1. Keep and maintain public records that ordinarily and necessarily would be required by TOWN in order to perform the services required under this Agreement;
  - 2. Provide the public with access to public records on the same terms and conditions that TOWN would provide the records and at a cost that does not exceed the cost provided in Chapter 119, Florida Statutes, or as otherwise provided by law;
  - 3. Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed, except as authorized by law; and
  - 4. Meet all requirements for retaining public records and transfer, at no cost to the TOWN, all public records in possession of CONTRACTOR upon termination of this Agreement and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All records stored electronically must be provided to TOWN in a format that is compatible with the information technology system of TOWN.
- (c) Failure to comply with this Section shall be deemed a material breach of this Contract for which TOWN may terminate this Agreement immediately upon written notice to CONTRACTOR.

By submitting a response to this solicitation, the company agrees to defend the Town in the event we are forced to litigate the public records status of the company's documents.

The provisions of this Ordinance are declared to be severable and if any section, sentence, clause or phrase of this Ordinance shall for any reason be held to be invalid or unconstitutional, such decision shall not affect the validity of the remaining sections, sentences, clauses, and phrases of this ordinance but they shall remain in effect, it being the legislative intent that this Ordinance shall stand notwithstanding the invalidity of any part.

Section 5. Inclusion in the Town Code. It is the intention of the Town Council, and it is hereby ordained, that the provisions of this Ordinance shall become and be made part of the Town Code and that if necessary the sections of this Ordinance may be renumbered or re-lettered to accomplish such intentions; and that the word "Ordinance" shall be changed to "Article", "Division" or other appropriate word.

<u>Section 6</u>. <u>Effective Date</u>. That this Ordinance shall be effective immediately upon its adoption on second reading.

## Town of Miami Lakes Memorandum

То:	Honorable Mayor & Councilmembers
From:	Edward Pidermann, Town Manager
Subject:	Ordinance Adjusting Mobility Fee Calculation Prcedures
Date:	December 10, 2019

## Background

On April 25, 2016 the Town Council adopted a mobility fee ordinance as an alternative to traffic concurrency to allow for the mitigation of transportation impacts of development that will more equitably fund multimodal mobility improvements rather than only automobile related improvements, as well as encourage better quality development and be more business friendly by providing for a simpler and less time-intensive approval process.

On February 2019 the Town Council approved a new business item instruction staff to assess the performance of the mobility fee since adoption, commission a study to establish new rates, and recommend any changes in language that may improve processes. This ordinance is reflects the changes staff finds necessary in order to improve the process of calculating the trips and assessing the mobility fee.

On December 3 2019 the Planning and Zoning Board, acting as the Local Planning Agency, heard the item and voted to recommend approval on the condition that definitions be added to describe the different uses cited on the Flat Trip Chart.

## **Recommendation:**

Staff recommends approval of the attached ordinance.

### **EXHIBIT** A

ARTICLE X. - CONCURRENCY REGULATIONS AND MITIGATION OF DEVELOPMENT IMPACTS

\* \* \* \*

**DIVISION 2. - MOBILITY FEE** 

\* \* \* \*

Sec. 13-2004. - Timing of calculation and payment of mobility fee due.

- (a) All development projects occurring within the incorporated area of the Town shall pay the mobility fee established in this division, except as explicitly otherwise provided for herein. For purposes of this division, the term "development projects" shall include any construction activity, or the establishment of a land use or change of a land use and any activities appurtenant thereto.
- (b) Except as otherwise provided in this division, the mobility fee shall be paid directly to the Town prior to the issuance of a building permit or a certificate of use, as applicable, whichever occurs earlier.
- (c) Where a development project or change of use requires a conditional use, site plan or plat approval prior to issuance of a building permit, the amount of the mobility fee due may, at the option of the applicant, be calculated and established as part of one of those processes, and such amount when established shall remain in effect until the conditional use, site plan or plat approval expires or <u>a full calendar year</u>, whichever comes first, regardless of any changes in the rate per daily trip that may occur in the interim between such approval and the issuance of a building permit or certificate of use, as applicable. However, if such approval is subject to a request for an extension, <u>either administrative or granted by the State of Florida</u>, the mobility fee due shall be reevaluated as part of the extension <u>application</u> and any changes in the rate per daily trip that have occurred in the interim between the original approval and the expiration of the approval (regardless of when the application for extension is submitted) shall be applied.
- (d) For development projects involving the subdivision of land into single family or two-family lots, the entire mobility fee due shall be paid prior to issuance of the first building permit in the subdivision, regardless of whether such permit authorizes construction of a residential structure or other structure, such as a club house, guard house or similar common amenity.
- (e) For proposed development other than subdivision into single family or two-family lots, the mobility fee due shall be paid prior to issuance of the first building permit that includes authorization to begin work on a structure or paving.

(Ord. No. 16-192, § 2, 4-25-2016)

Sec. 13-2005. - Calculation of mobility fee due.

- (a) The mobility fee due for a development project shall be calculated as follows:
  - (1) The project's net daily person-trip generation, as determined according to the procedures in this section, shall be multiplied by the rate per daily trip established according to the procedures in Section 13-2006.
  - (2) From the result of Subsection (a)(1), subtract the value of any mobility credits earned according to Section 13-2007. The result is the mobility fee due.
- (b) A development project's net daily person-trip generation shall be determined by one of the following methods:

(1) The development project's net daily person-trip shall be calculated by multiplying the number of units of the proposed use by the amount shown in the following Flat Trip Chart:

Residential Single Family and Town home (per unit)	<u>9.44</u>
Residential Multifamily (per unit)	<u>7.32</u>
Commercial Retail (per 1000 sf or portion thereof)	<u>61.64</u>
<u>Commercial Restaurant full service (per 1000 sf or portion</u> thereof)	<u>112.18</u>
Commercial Restaurant fast food (per 1000 sf or portion thereof)	<u>470.95</u>
Office General (per 1000 sf or portion thereof)	<u>9.74</u>
Office Medical (per 1000 sf or portion thereof)	<u>34.80</u>
Industrial (per 1000 sf or portion thereof)	<u>1.94</u>

- (1)(2) The greater of either the weekday or weekend trip generation rate of the land use(s) proposed in the development project, minus the pass-by rate, as calculated, signed and sealed by a duly licensed traffic engineer and according to the most current edition of the Trip Generation Manual, published by the Institute for Transportation Engineers (ITE) (hereafter "Trip Generation Manual"). Thereafter, multiply the result by the mean auto occupancy of trips generated by that land use, determined according to Subsection (b)(2). In the event that a development project involves a land use not included in the Trip Generation Manual, the Administrative Official shall calculate the appropriate mobility fee. The Administrative Official shall utilize as a standard in this determination the trip generation rates in the most similar land use category or any other generally accepted standard source of transportation engineering or planning.
- (2)(3) The mean auto occupancy of trips generated for each land use shall be established, and amended from time to time, by resolution of the Town Council. Mean auto occupancy shall be based on the best available data, and shall initially be determined by the October 2000 Southeast Florida Regional Travel Characteristics Study. Upon the publication of more recent, professionally-accepted data and analysis appropriate to establish mean auto occupancy, the Town Council shall amend the mean auto occupancy by land use by resolution.

(3)(4) Alternative trip generation study.

a. In the event an applicant reasonably believes that the daily trip generation pursuant to Subsection (b)(1) does not reasonably approximate the likely actual trip generation of the proposed development, then the applicant may, prior to issuance of a building permit for such development project, file with the Administrative Official an alternative trip generation study, along with the fee prescribed by Article XI, that seeks to establish an alternative fee. This study shall be based on standard engineering and planning practice, using the Trip Generation Manual as a base. The Administrative Official shall review the alternative calculations and make a determination within 30 days of submittal as to whether such calculation complies with the requirements of this section. Failure to render a decision within 30 days shall be deemed a denial.

- b. If the Administrative Official determines that the data, information and assumptions utilized by the applicant to establish an alternative trip generation is more appropriate, then the mobility fee assessed shall be paid based on the alternative methodology.
- c. If the Administrative Official determines that the data, information and assumptions utilized by the applicant to establish an alternative trip generation does not demonstrate that it is a more appropriate approximation of the likely actual daily trip generation of the development project, then the Administrative Official shall provide to the applicant written notification of the rejection of the alternative trip generation and the reasons therefore, including notification that the mobility fee as applicable, shall be paid in accordance with the provisions of this division.
- d. An applicant who submits a proposed alternative trip generation pursuant to this subsection and desires the issuance of a building permit prior to the resolution of a pending alternative fee shall pay the applicable mobility fee prior to or at the time said applicant desires the building permit. Said payment shall be deemed paid "under protest" and shall not be construed as a waiver of any rights. Any difference in the amount of the fee after resolution of the pending alternative fee shall be refunded to the applicant or owner.
- (d) In the event a development project involves a mixed-use project, the Administrative Official shall calculate the mobility fee based upon <u>the sum of</u> each land use category included in the proposed mixed use project, and the proportion of the total project represented by each land use category.
- (e) An applicant may appeal any determination of the Administrative Official under the provisions of this section in accordance with Subsection 13-302(i).

(Ord. No. 16-192, § 2, 4-25-2016)

\* \* \* \*

#### Sec. 13-2007. - Mobility fee credits.

The Town Council finds that certain improvements or actions instituted or committed to as part of a development project tend to partially mitigate the development's impact upon the transportation system, reduce peak hour traffic congestion and/or shift trips from single-occupant vehicle travel to other modes. Therefore, those improvements or actions, when not otherwise required by local, state or federal laws or regulations, may reduce the mobility fee due for a development project, as further set out herein.

- (1) A developer wishing to receive a mobility fee credit shall submit an application to the Administrative Official with the fee prescribed in Article XI of the chapter. The application shall set forth what improvements or actions, not otherwise required by local, state or federal laws or regulations, are proposed and what mobility fee credit is due for those improvements or actions; In reviewing the application, the Administrative Official shall follow the procedures for applications as enumerated in Section 13-301. The Administrative Official shall take action on the application by written development order, and may approve, approve with modifications and/or conditions or deny the application. Where the application for a mobility fee credit is submitted in conjunction with another application under this chapter, the Administrative Official may combine the development order under this subsection with that of the other application. Any appeals of the Administrative Official's decision shall be in accordance with Subsection 13-302(i).
- (2) The following table sets forth the improvements or actions eligible for a mobility fee credit, and the amount of such credit:

Improvement or Action	Type of Eligible Project	Credit Available (Daily Trips)	Special Requirements
Bicycle parking spaces on-site	All types of development/uses other than single family and two-family projects. However, bicycle parking spaces developed as part of a single family or two family development as part of common areas may, at the discretion of the Administrative Official, be eligible so long as said bicycle parking spaces are accessible to the general public.	One-half trips [trip] per bicycle parking space not located on a site adjacent to a designated greenway. One trips [trip] per bicycle parking space located on a site adjacent to a designated greenway.	All bicycle parking spaces used for mobility fee credit shall be over and above those otherwise required by the LDC or which are provided as part of another incentive program under the LDC. In order to receive mobility fee credits for bicycle parking spaces, said spaces be must accessible to the general public and so located on the site as to encourage bicycle use, as determined by the Administrative Official.
Mixed-Use Development	Projects that include at least two different general types of land uses (i.e. residential, commercial, office and industrial) wherein no one use category exceeds 75 percent of the total floor area.	Up to ten percent of daily trips, at the discretion of the Administrative Official.	Applicants must demonstrate that the mixed use project is so designed to achieve internal trip capture and encouragement of alternative modes. The percent of daily trips credited shall be based on the level

			of mitigation of transportation impacts expected due to the mixed use nature of the development, supported by data and analysis submitted by the applicant.
Preferred parking for carpools	Nonresidential development	Three trips for preferred carpool parking space, up to ten percent of daily trips.	Preferred parking for carpools shall be demonstrated to be advantaged over other parking spaces at the facility.
Pedestrian throughways and bicycle facilities.	All	Maximum of three percent of daily trips.	Applicant must demonstrate that the proposed pedestrian throughway will contribute to creating a safe, comfortable and convenient pedestrian and bicycle network in Miami Lakes, or will help to complete a designated greenway. Any such facility receiving a mobility fee credit shall be accessible to the general public. One or more easements for public access may be required, at the discretion of the Administrative Official.
Placing parking in the rear	Nonresidential, mixed use and multifamily residential development	Maximum of three percent of daily trips.	The amount of credit given shall be based on the proportion of parking placed in the rear of the building. All parking must be placed in the rear in order to receive the full three percent credit.
Flexible work arrangements and/or staggered work arrangements	Nonresidential development and uses	Up to five percent of daily trips	
Employer provided	Any property or use, other than single family, two-family	One percent for each	One transit pass shall equal a Miami-Dade County transit

Employers must demonstrate good faith in encouraging use of transit, and making reasonable scheduling accommodation to account for transit schedules.
Developer or employer sponsored transit	Office and industrial development or uses cumulatively accounting for at least 150 employees. More than one employer on a single site or on more than one site that are located within one- quarter mile of a central point may jointly apply to receive this credit.	Up to three and one-half percent of daily trips	The applicant or applicants for developer or employer sponsored transit shall submit a plan to be considered for approval by the Administrative Official.
Dollar-for- Dollar contribution	<u>All projects</u>	At the sole discretion of the Town, an applicant may elect to construct, pay for, or contribute, a qualified capital improvement or right-of- way contribution to a mobility facility in the mobility network in order to satisfy its mobility fee obligation on a dollar-for- dollar basis against the value of said contributed, qualified capital improvement	Qualified capital improvements will include technology improvements that the Town has identified, adopted, and prioritized as part of its strategic planning

(3) Mobility fee credits to be received via flexible work arrangements, staggered work schedules, or developer or employer sponsored transit must include, along with the application for mobility fee credits, a detailed plan for how these arrangements will be implemented and, upon approval by the Administrative Official, a declaration of restrictions, in a form acceptable to the Administrative Official and the Town Attorney, shall be executed and recorded by the property owner to ensure continued implementation of the plan. #### **MEMORANDUM**

#### 2019 Update to Town of Miami Lakes Mobility Fee

#### **Background**

The Miami Lakes Mobility Fee was adopted via Ordinance 16-192 on December 1, 2015. Its purpose is to ensure that multimodal transportation infrastructure, necessary to support level of service standards, is in place at the time of development. It also creates a platform for developments to contribute to the funding and implementation of those projects in order to mitigate the developments impact to the multimodal transportation network, as well as fund multimodal mobility enhancements not just automobile related improvements. The mobility fee encourages better quality development and is more business friendly as it provides for an easier approval process.

Per the recommendation of the Alternative to Concurrency Study, the Town Council established a Mobility Fee in lieu of traditional transportation concurrency. Chapter 13 Land Development Code Division 2 Sec. 13-2006 (a) states:

The rate per daily trip, and subsequent amendments thereto, shall be established by the Town Council by resolution, based on the methodology as described in subsection (b) of this section. The rate per daily trip shall be reviewed by the Town Council at least once every three years but may be reviewed more frequently. The initial and each review thereafter shall consider changes to the demand component of the mobility fee equation, changes to the Town's CIE, changes in construction, land acquisition and related costs, changes in historical and projected funding, adjustments to the assumptions and conclusions or findings set forth in the Study.

#### <u>Analysis</u>

The 2019 Mobility fee update will review the above as required by Ordinance 16-192, as included in the Miami Lakes Land Development Code and other technical aspects of the fee schedule. Changes in growth rates, traffic generation rates, and land use changes will also be documented in this update memorandum. Any updates to the Mobility Fee proposed will continue to support the funding of multi-modal transportation projects within the Town of Miami Lakes. In addition, any changes to the Mobility Fee will only be based on the most current data per Florida Statutes. The Miami Dade County Long Range Transportation Plan 2045 is not complete, as such it will not be referenced in this update.

This memo documents updates to technical aspects of the fee schedule, such as lower anticipated growth rates, changes in transportation revenue programs, and increased costs of providing transportation facilities and services. Some of the specific changes incorporated include:

- Updating traffic generation rates for some land uses to address a newly- released version of the Institute of Transportation Engineers Trip Generation reference
- Proposing Flat Trip Generation Rates for specific use types
- Gas Station/Service Station with Convenience Store Analysis

- Fast-Casual Restaurant Analysis
- Trip Generation based on vested and committed development projects

#### Recommendations

Trip characteristics utilized in the Mobility Fee were taken from the Institute of Transportation Engineers' (ITE) Trip Generation reference report 9<sup>th</sup> Edition. Changes in this report include updated traffic generation rates provided in the 10<sup>th</sup> Edition Institute of Transportation Engineers' Trip Generation reference, released in late 2017. The changes are listed below:

- 230 Condominium/Townhouse is no longer a land use in the ITE 10<sup>th</sup> edition
- 231 Mid-Rise Residential with 1<sup>st</sup> Floor Commercial and 232 High-Rise Residential with 1<sup>st</sup>
   Floor Commercial were added as they are in the ITE manual 10<sup>th</sup> edition
- 492 Racquet Club/Health Club/Spa/Dance Studio and 437 Bowling Alley rates were changed because of the time period in which the rate was taken. In the 9<sup>th</sup> edition the weekday period was used. However, the 10<sup>th</sup> edition does not have this time period as an option. The rates for these land uses were taken from the weekday, PM peak hour time period.
- 820 Retail (1,000-50,000 s.f) thru 820 Retail (greater than 500,000 s.f.) is one single land use
   820 Shopping Center. The 10<sup>th</sup> edition land use is incorporated.
- 120 General Heavy Industrial is no longer a land use and there is no alternative in the 10<sup>th</sup> edition
- 152 High-Cube Warehouse is no longer a land use, 154-157 were added and are included in the 10<sup>th</sup> edition

Another recommendation is to assess a flat trip rate that is justifiable to apply against acreage and dwelling units. Flat trip rates have now been added as part of the mobility fee update. For the chart below, the trip generation rates for residential land uses are trips/dwelling unit. For commercial, institutional, and industrial, the trip generation rates are per 1000 sq. ft.

Flat Trip Rate for Residential Low Density	7.23
Flat Trip Rate for Residential Low-Med Density	7.32
Flat Trip Rate for Residential Med Density	2.87
Flat Trip Rate for Residential Med-High Density	0.31
Flat Trip Rate for Recreational	78.92

Flat Trip Rate for Institutional	7.69
Flat Trip Rate for Commercial (includes Transient, Office and Retail)	61.64
Flat Trip Rate for Industrial	1.94

#### Gas Stations/Convenience Stores

An additional recommendation for the revision to the Mobility Fee Schedule is to the gas stations with convenience stores use. A recent trend is larger convenience markets with more fueling stations. It is recommended that an amendment be made to pass-by trip percentage from 66% to 77% based on FDOT Trip Generation Recommendations for Convenience Markets with Gas Pumps. There has been an increase in the size on convenience stores and number of fueling positions. These new facilities offer additional services, such as car washes, larger markets, fast food restaurants, and the ability to pay at the pump, have changed travel characteristics.

#### **Fast-Casual Restaurant**

An emerging trend in the area is the Fast-Casual Restaurant. Including Fast- Casual Restaurant (930) in the Mobility Fee Schedule is another recommendation. A fast-casual restaurant is a sit-down restaurant with no wait staff or table service. Customers typically order off a menu board, pay for food before the food is prepared, and seat themselves. The menu generally contains higher quality made to order food items with fewer frozen or processed ingredients than fast food restaurants. The website tripgeneration.org (accessed on 7/19/2018) provided a database of four studies of Fast- Casual restaurants, yielding an average rate of 179.78 trip- ends per 1,000 s.f. The percent new trips and trip length values from the High- Turnover, Sit- Down restaurant were found to be suitable and were applied to this land use. Miami Lakes is a prime location for the development of fast-casual/food hall type dining. The average vehicle trip rate per 1,000 s.f. is 315.17 based on the 10<sup>th</sup> Edition Trip Generation Manual.

#### Trips

Per Ordinance 16-192(b), the rate per daily trip shall be calculated by determining the difference between current development and projected future development levels. The vested and committed projects were reviewed. Based on the total vested and committed projects for 2016-2019 newly approved projects (as compared to when the fee was first adopted), there is an additional 16,684 trips. The following lists trips generated by use:

Total Residential Trips	6,798
Total Multi Use Trips	4,065
Total Commercial Trips	1,443
Total Industrial Trips	310
Total Institutional Trips	934
Total Services Trips	3,134
Total New Trips	16,684

In determining the maximum allowed built capacity, the 2013-2017 ACS housing units (10,397) were subtracted from the FLU maximum allowed built capacity (27,746 d/u), which totaled 17,349 dwelling units. Vested units amount to 1,472. Therefore, there are now 15,876 units of remaining capacity. This is a reduction from the original study from 18,172 housing units, as there are now pending developments.

The total maximum allowed built capacity in acres (taking into consideration the FAR and height) for each land use category is 259 acres for commercial and 528 acres for industrial. There was a reduction in the total maximum allowed built capacity in acres from 555.98 as part of the original study to 528 acres for industrial and from 260 to approximately 259 acres of commercial, due to pending developments within the land use categories. Additionally, 25.09 acres of Commercial and 42.05 acres of Industrial land uses are currently vested. Remaining assessable capacity then, are 234.2 acres for commercial and 485.95 acres for industrial.

As noted previously, there were some changes to the daily weekday person-trip generation due to changes in the Trip Generation Manual 10<sup>th</sup> Edition. Also, flat trip rates have now been added as part of the mobility fee update.

To keep the fee accurate as time progresses, an annual adjustment based on inflation should be made to the assessments of the remaining transportation projects. This adjustment can come from a variety of sources – the Bureau of Labor Statistics maintains a Consumer Price Index as a benchmark, as does the Florida Department of Transportation, in regards to transportation projects, in the form of a Work program inflation factor; the current model accounts for this change by recommending an annual change rate based on the Florida Department of Transportation's rate, given its closer relationship with transportation infrastructure development. Transportation improvement costs from the Town's Capital Improvements Element (CIE), and other adopted Town transportation mobility plans and policies were computed. Costs were adjusted from the time of their original estimation to account for inflation, according to the "Inflation Factors" published by the Florida Department of Transportation (FDOT).

As the impact fee is contingent on the trips generated versus the infrastructure necessary to support the incoming population, as large scale amendments to the future land use accrue, staff should carefully evaluate and consider amendments to the fee in order retain appropriate levels of justification relative to the changes in the build out model utilized in the designation of the fee. Based on evidence that there was very few large-scale amendments, it has been determined after careful review that no future land use amendments since the adoption of the Mobility Fee have a large enough impact on trips generated versus infrastructure to make any changes to the actual fee structure. However, recommended changes are due to updates in the ITE 10<sup>th</sup> Edition Manual.

#### Credits

After a full review of the existing mobility fee credits, minor changes are recommended for the mobility fee credit system. These changes include the considerations for technology improvements enhancing local mobility as desired by the Town, and removal of several existing credit categories.

The Town should continue to issue mobility fee credits to developments with the following types of development for the following improvement types:

- Bicycle Parking Spaces
- Mixed Use Development
- Pedestrian Throughways and Bicycle Facilities
- Rear Parking
- Developer/Employer sponsored Transit

No changes to established ratios within the current code is recommended at this time. It is recommended that the Town, similar to other entities in Florida which are adopting Mobility Fees, continue to utilize the 3-year period as the mandated update to review the fee and associated assumptions.

Due to the difficulties in administration, it is recommended that the Town remove the following fee credits:

- Preferred Parking Carpools
- Flexible/Staggered Work Arrangements
- Employer provided Transit Passes

It is recommended that the Town consider the following additions to the fee system:

• Dollar-for-Dollar contribution – It is recommended that the Town include the following in its consideration for text amendments:

"At the sole discretion of the Town, an applicant may elect to construct, pay for, or contribute, a qualified capital improvement or right-of-way contribution to a mobility facility in the mobility network in order to satisfy its mobility fee obligation on a dollar-fordollar basis against the value of said contributed, qualified capital improvement."

In consideration of application of this ordinance, the Town should indicate that qualified capital improvements will include technology improvements that the Town has identified, adopted, and prioritized as part of its strategic planning.

#### Exemptions

There are no recommended changes to Sec. 13-2009. Exemptions.

As projects become fully funded, they should be removed from the list of planned infrastructure requiring funding. These projects, once implemented, will thus not be impacted by annual increases based on inflation. As newer development is approved and funding from the impact is assessed, the impact of that development, both in population growth and trips generated, as well as the fees assessed, count towards both ends of the fee's model structure, which is based on cost per trips generated. The application of reduction of both trips and fees assessed keeps the fees model in equation; as long as the fees assessed are based on trips. Only two of the projects listed as Mobility Fee Expenditures are listed on the Existing Transportation Projects list.

- Initiative 1.1.6 Incorporate Greenway Path (0.38 miles) along NW 60<sup>th</sup> Avenue from NW 154 (Miami Lakes Drive) to NW 138<sup>th</sup> Street- Phase 1 Total estimated project cost is \$1.3 million. \$300,000 Mobility Fee Expenditure
- Initiative 1.9.1 Incorporate Adaptive Signalization along NW 154<sup>th</sup> \$80,940 Mobility Fee Expenditure

When comparing the mobility fee revenues vs expenditures, mobility fees collected in Fiscal Years 2017 and 2018 amount to \$761,271. Expenditures in those same years amount to \$751,503. There was a balance of \$9,768. Projected revenues for Fiscal Years 2019 and 2020 amount to \$1,686,688. This depends on the actual future development permits being processed as proposed. Thus far all mobility funds are accounted for. However, there are a number of transportation projects from the 2014 list that have not been completed. The overall transportation projects list has been updated in order to project cost estimates for the designation of future mobility fees.

#### **Mobility Fee**

The following represents the methodology to construct and maintain the impact fee system as well as the recommended update to the actual mobility fee.

1. Determine increase in socio-economic data from base year to target future year (20 years). Determination of this factor is based upon the difference between current development levels and future development levels. To accomplish this, the future land use must be employed and compared to existing development.

	2019
Residential	15,876 dwelling units
Commercial	234.2 acres
Industrial	485.95 acres

It is important to note there was an assumed land use spread when calculating the rate for commercial with 20% transit-oriented development/mixed use, 30% office, and 50% retail.

 Determine trip generation rates for resulting land use increases from step 1 above using daily trip rates (weekday) from ITE Trip Gen Handbook 9<sup>th</sup> Edition and Household Survey Model. The updated rates from the ITE Trip Generation Handbook 10<sup>th</sup> Edition were used as part of this update.

	2019 Trips
Residential	86,557
Commercial	522,329
Industrial	16,525
Total	625,411

However, a proportion of this must be taken to relate to the same timeframe as the existing current projects, as this is for 20 years and the CIP is for 5 years. Growth is not linear, but rather based on existing market conditions – this is a primary reason why the fee must be

adjusted with new assumptions every 3 years. For the current cycle, we expect growth to continue at similar pace as before, with some slowdown due to the amount of existing growth, and assume a slower 10% growth in trips.

Assuming 10% the daily trips generated is:

2019 daily trips	<u> </u>	0
62,541		

3. Compute transportation improvement costs from the Town's Capital Improvement Element (CIE), Transportation Master Plan (TMP), the Town's transportation mobility plans, and Unfunded Projects from the MPO's Long Range Transportation Plan (LRTP).

Using the compiled transportation projects master list (Attachment C), an aggregate cost to complete all the projects can be constructed. In considering the various projects that can be built, it is importation to consider that there are projects which may have funding that is reasonably expected from outside funding sources, including grants. In cases where this funding is reasonably expected, these projects should not be included in the computation costs.

Rationale: Not Included = Projects fully funded in the MPO's Transportation Improvement Program (TIP) and those from their LRTP where funding is reasonably expected (federal, state, county and other). Included = Projects included in the Town's Transportation Master Plan (TMP) and the Capital Improvement Element (CIE) such as roadway widening, roadway reconstruction, road resurfacing, lighting, traffic signals, roadway drainage, intersection improvements, roadway landscaping, sidewalks, bike paths.

The costs as noted in the previous report were current at that time. However, as the projects were carried over for multiple years, inflation factors were included using the FDOT Work Program inflation factors.

Additional projects have been placed in the Town's Master Plan, resulting in a need to adjust the fee.

2014	2019
\$12,549,293	\$35,170,229

For the 2019 numbers, it should be noted that \$1,114,086 has been previously collected for local improvements. In addition, the Town is slated to receive \$9,096,994 in grants. The remaining \$ 24,959,149 are unvested and unfunded items the Town intends to assess as part of the mobility fee. \$ 12,479,575 of the projects should be assessed to implement the new multimodal facilities to mitigate future impact of trips.

In addition, the Town's recently adopted SMART Technology Implementation Plan 2020-2035 contains \$15,194,500 of projects for implementation, of which \$14,309,500 is eligible as mobility-based projects. Given the timeframe and adopted strategic action items, the combination of master plan and technology implementation plan is \$26,789,075.

4. Compute Total Cost per Daily Trip

For the purposes of this calculation, we are utilizing the Total cost per daily trip as indicated by the expected daily trips based on the designated build out, as this is a more accurate representation of expected development in the time period.

Total cost per daily trip = Total Cost/daily trips generated	
2014 Total Cost per daily trip	2019 Total Cost per daily trip
\$160.00 per trip	\$428.34 per trip

 $J_{2}$   $J_{2$ т

The per fee trip has increased due to a change in the number of trips resulting from the update of the ITE Trip Generation Manual and due to the increase in the cost and number of transportation projects, which added approximately \$2.7 million in additional costs. The latter factor is the primary factor in the increase. As stated previously, the 9<sup>th</sup> Edition was used for the previous study.

5. Add 5% administrative costs.

#### Total Per Trip Fee \$449.76.

In summary, costs were updated to take into account inflation, updates to the Town's TMP, CIE, and the MPO's LRTP, and newly approved developments.

#### Operational improvements:

During the course of the study, it was indicated that certain land use categories have higher than average fees due to the potential for high trip calculations. In those cases, it is recommended that the Town utilize a pass-through factor mutually agreed upon by both the Town and the applicant to reduce the number of trips in unique cases. Pass through rates are provided within the ITE Trip Generation Manual, 10<sup>th</sup> Edition, and have been updated from the prior 9<sup>th</sup> Edition Manual.

Further, the current ordinance provides that Council may, at its discretion, agree to lower the fee assessment on a case by case basis. It is recommended that the Town continue to keep this provision of the ordinance and exercise as needed in unique cases such as with the above.

Staff Analysis and Recommendation

To: Honorable Mayor and Councilmembers

From: Edward Pidermann, Town Manager

Subject: Eight-foot fences

Date: December 10, 2019

AN ORDINANCE OF THE TOWN COUNCIL OF THE TOWN OF MIAMI LAKES, FLORIDA, RELATING TO PERMITTED FENCE HEIGHTS FOR SINGLE-FAMILY AND TWO-FAMILY BUILDINGS; AMENDING CHAPTER 13, "LAND DEVELOPMENT CODE", AT ARTICLE V, "ALLOWABLE ENCROACHMENTS INTO THE REQUIRED YARDS AND EXCEPTIONS TO THE MAXIMUM PERMITTED HEIGHTS", AT SECTION 13-1509, "FENCES, WALLS AND GATES,"; PROVIDING FOR REPEAL OF LAWS IN CONFLICT; PROVIDING FOR SEVERABILITY; PROVIDING FOR INCLUSION INTO THE CODE; AND PROVIDING FOR AN EFFECTIVE DATE. (Cid)

#### A. BACKGROUND

On September 10, 2019 Mayor Cid introduced a new business item instructing staff to prepare an ordinance for consideration by the Town Council allowing for fences eight feet in height wherever a single family home abuts a different use.

On October 23 2019 the Planning and Zoning Board in their capacity as the Local Planning Board Considered the item as proposed and recommended amending the proposed ordinance to include additional language allowing hedges up to 8 feet in height in all interior side or rear single family property lines that do not abut a water way or are located in the required front yard.

On November 12, 2019 the Town Council heard the item on first reading and voted to approve the ordinance.

#### **B. PROPOSED CHANGES**

The following described elements are presented in the same order that they appear in the proposed ordinance.

Sec. 13-1509. - Fences, walls and gates. Language was added and amended to allow walls and fences up to eight feet in height wherever single-family homes abut a property with a different use.

#### C. STAFF RECOMMENDATION

Based on the analysis provided below and other factors contained in this report, Staff recommends approval of the ordinance amending Section 13-1509 as it relates to height of walls and fences.

#### E. ANALYSIS

The Land Development Code provides that all proposed amendments to the LDC shall be evaluated by the Administrative Official, the Local Planning Agency and the Town Council, and that, in evaluating the proposed amendment, the criteria in Subsection 13-306(b) shall be considered. All portions of this report are hereby incorporated into all portions of this analysis. The following is a staff analysis of the criteria as applied to this ordinance.

# 1. Whether the proposal is consistent with the Comprehensive Plan, including the adopted infrastructure minimum levels of service standards and the concurrency management program.

*Analysis:* See Sections "A", Background; and "B", Proposed Changes, of this report. the proposal has no impact on levels of service or concurrency management programs.

*Finding:* Complies

## 2. Whether the proposal is in conformance with all applicable requirements of this Code of Ordinances, including this chapter.

*Analysis:* See Sections "A", Background; and "B", Proposed Changes, of this report. The proposed ordinance seeks to clarify and extend existing regulations regarding walls and fences in residential districts. The proposed amendment does not conflict with any of the Town's existing provisions.

Finding: Complies.

# 3. Whether, and the extent to which, land use and development conditions have changed since the effective date of the existing regulations, and whether such changes support or work against the proposed change in land use policy.

*Analysis* See Sections "A", Background; and "B", Proposed Changes, of this report. The existing regulations allow for six-foot fences along interior side and rear property lines and eight-foot hedges wherever a single-story home abuts a two-story home. Single-family homes that abut multifamily, commercial, or industrial uses, have the option to erect eight-foot hedges, but not walls or fences. Under some conditions, hedges are insufficient as a barrier as they fail to block smells and noise.

Finding: Complies.

4. Whether, and the extent to which, the proposal would result in any incompatible land uses, considering the type and location of uses involved, the impact on adjacent or neighboring properties, consistency with existing development, as well as compatibility with existing and proposed land use.

*Analysis:* See Sections "A", Background; and "B", Proposed Changes, of this report. The proposed amendment seeks to remedy existing de-facto incompatibilities between adjoining land uses of different natures.

Finding: Complies.

5. Whether, and the extent to which, the proposal would result in demands on transportation systems, public facilities and services, exceeding the capacity of such facilities and services, existing or programmed, including schools, transportation, water and wastewater services, solid waste disposal, drainage, water supply, recreation, education, emergency services, and similar necessary facilities and services.

*Analysis:* See Sections "A", Background; and "B", Proposed Changes, of this report. The proposed ordinance does not impact the above systems.

Finding: Complies.

6. Whether, and the extent to which, the proposal would result in adverse impacts on the natural environment, including consideration of wetland protection, preservation of any groundwater aquifers, wildlife habitats, and vegetative communities.

Analysis: See Sections "A", Background; and "B", Proposed Changes, of this report. The proposed ordinance does not impact the above systems.

Finding: Complies.

## 7. Whether, and the extent to which, the proposal would adversely affect the property values in the affected area, or adversely affect the general welfare.

*Analysis:* See Sections "A", Background; and "B", Proposed Changes, of this report. Single family properties that share property lines with more intensive uses can have their property values adversely affected if proper barriers are not allowed by the Town Code. As such, the proposed ordinance is in the interest of the general welfare of the Town and its residents.

Finding: Complies.

#### 8. Whether the proposal would result in an orderly and compatible land use pattern. Any positive and negative effects on such pattern shall be identified.

*Analysis:* See Sections "A", Background; and "B", Proposed Changes; and Criteria 1, 2, 4, and 7 of this report.

Finding: Complies.

# 9. Whether the proposal would be in conflict with the public interest, and whether it is in harmony with the purpose and intent of this chapter.

*Analysis:* See Sections "A", Background; and "B", Proposed Changes; and Criteria 1, 2, 4, 6, and 7 of this report.

Finding: Complies.

# 10. Other matters which the Local Planning Agency or the Town Council, in its legislative discretion, may deem appropriate.

*Analysis:* See all portions of this analysis. The Local Planning Agency and the Town Council may consider other appropriate factors to determine whether the proposed amendment is appropriate and consistent with the public interest.

Finding: As determined by the Town Council.

## Town of Miami Lakes Memorandum

То:	Honorable Mayor & Councilmembers
From:	Edward Pidermann, Town Manager
Subject:	Senior Village Site Plan Amendment
Date:	December 10, 2019

#### Background

On June 6 2017 the Town Council approved Resolution 17-1455, a site plan application by The Graham Companies for the project known as "The Residences at Governor Square" or the Senior Village, located on the west side of Commerce Way and NW 146<sup>th</sup> street. The conditions of approval for the siteplan include, among others, requirements that an Asisted Living Facility be developed concurrently with the residential portion. In addition, the Graham Companies proffered a Declaration of restrictions dealing with particular provisions as to age of residents date of occupancy and other specifications dealing with the operations of the residential portion of the project, as well as a Memorandum of Understanding proferring the donation of both land and shell structure for a Senior Center to be run and operated by the Town of Miami Lakes

On the same June 6 2017 hearing, the Town Council heard and approved and application by Miami Jewish Health Systems for a site plan, conditional use and parking variance for the development, construction and operation of the Asisted Living Facility required by the conditions of Resolution 17-1455.

Miami Jewish Health Systems has since withdrawn from the project and The Graham Companies have began to search for a new operator for the ALF. The search process is burdened by the fact that the resolution repeatedly refers to Miami Jewish Health Center as the developer and operator of the Asisted Living Facility component of the project. In addition, the residential portion of the project will be ready to begin construction shortly, while any new operator for the ALF will need to get through the siteplan and conditional use approval process.

The application before the Town Council requests the removal of Miami Jewish Health Systems as operator of the ALF, as well as removal of the requirement that both projects be developed simultaneously.

#### **Recommendation:**

Staff recommends consideration of the attached resolution.

Resolution Letter of Intent RES 17-1455 Ord. 17-206

#### RESOLUTION NO. 19-\_\_\_\_

A RESOLUTION OF THE TOWN COUNCIL OF THE TOWN OF MIAMI LAKES, FLORIDA, PERTAINING TO A REQUEST IN ACCORDANCE WITH SECTION 13-304 OF THE TOWN OF MIAMI LAKES LAND DEVELOPMENT CODE FOR AN AMENDMENT TO A SITE PLAN APPROVAL AS PROVIDED AT EXHIBIT "A"; FOR THE PROPERTY LCOATED ON THE WEST SIDE OF COMMERCE WAY AND N.W. 146<sup>TH</sup> STREET, AS MORE PARTICULARLY DESCRIBED AT EXHIBIT "B", BEARING FOLIO NO. 32-2022-008-0010; PROVIDING FOR INCORPORATION OF RECITALS; PROVIDING FINDINGS; PROVIDING FOR VIOLATION OF CONDITIONS, PROVIDING FOR APPEAL; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, at the time of site plan approval the Applicant proffered a Declaration of Restrictions as part of the application request, that among other items, addresses residency age restrictions, date of occupancy, and term of agreement; and has provided a Letter of Mutual Understanding regarding coordination for use of on-site amenities for senior recreational programing, all of which are incorporated into Staff's analysis and recommendation; and

WHEREAS, said Development Order included references to Miami Jewish Health Systems Assisted Living Facility to be developed on a nearby parcel simultaneously; and,

WHEREAS, Miami Jewish Systems has since withdrawn from the project, and the Residences at Governor Square is actively searching and negotiating with alternative developers and operators for the Assisted Living Facility; and

**WHEREAS,** in accordance with Section 13-309 of the Town LDC, proper notice was mailed to the appropriate property owners of record, notice was posted at the property, and the duly advertised in the newspaper; for a quasi-judicial public hearing on the amendment to the Site Plan as noticed for Tuesday, Decembe**318**, 2019, at 6:30 P.M. at Town Hall, 6601

Main Street, Miami Lakes, Florida; and all interested parties had the opportunity to address their comments to the Town Council; and

WHEREAS, the Town Council now desires to conditionally approve the Applicant's Site Plan amendment request.

NOW, THEREFORE, BE IT RESOLVED BY THE TOWN COUNCIL OF THE TOWN OF MIAMI LAKES, FLORIDA, AS FOLLOWS:

<u>Section 1.</u> <u>Recitals.</u> The foregoing recitals are true and correct and are incorporated herein by this reference.

Ms. Susana Alonso Town Planner Town of Miami Lakes 6601 Main Street Miami Lakes, FL 33014 Delivered by email

Dear Ms. Alonso,

We kindly request an amendment to Resolution No. 17-1455 approving the site plan for "The Residences at Governor's Square". In particular, in Section 3 No. 2, the resolution required the issuance of permits for the Miami Jewish Health Systems ("MJHS") facility as well as completion of construction of the Miami Jewish Health Systems facility within certain designated timeframes. As you are aware, Miami Jewish is not proceeding with their project in Miami Lakes and therefore these conditions cannot be met as prescribed in the resolution.

We ask that the amended resolution be silent on the requirements on the parcel that was previously contemplated for development by MJHS so that The Graham Companies ("TGC") may proceed with development and construction of the senior community center and the 220-unit age-restricted adult community. TGC has been in serious and extensive discussions over the past 10 months with numerous providers of senior housing and it has become evident that this revision will be necessary in order to attract a well-respected and well-funded operator to provide the assisted living component of the senior village.

TGC is very much committed to the original vision of developing a world class senior living village in Miami Lakes and to that end, is willing to proffer a covenant to be placed on the land where MJHS was going to build their facility that will limit uses on that parcel to senior independent living, assisted living, memory care, skilled nursing and other services that are primarily geared towards serving the elderly community in Miami Lakes. Site plan and conditional use approvals on the site will require approval by the Town Council.

I look forward to your expedited response and hope that we can get the amended resolution approved at the November hearing.

١ Luis O. Martinez Senior Executive Vice President

## Town of Miami Lakes Memorandum

То:	Honorable Mayor & Councilmembers
From:	Edward Pidermann, Town Manager
Subject:	Mobility Fee Rate per Daily Trip
Date:	December 10, 2019

#### **Background:**

On April 25, 2016 the Town Council adopted a mobility fee ordinance as an alternative to traffic concurrency to allow for the mitigation of transportation impacts of development that will more equitably fund multimodal mobility improvements rather than only automobile related improvements, as well as encourage better quality development and be more business friendly by providing for a simpler and less time-intensive approval process. Trip. The ordinance provided for the establishment by Resolution of the Rate per Daily Trip, and for the periodic reevaluation of said rate.

On February 2019, the Town Council approved a new business item instructing staff to assess the performance of the mobility fee since adoption, commission a study to establish new rates, and recommend any changes in language that may improve processes. A study was commissioned according to the methodology established by the code. The study by Corradino and Associates, see attached, reaches the conclusion that the appropriate rate per daily trip at this time is \$449.76.

#### **Recommendation:**

Staff recommends approval of the attached ordinance establishing the rate per daily trip as \$449.76.

#### **MEMORANDUM**

#### 2019 Update to Town of Miami Lakes Mobility Fee

#### Background

The Miami Lakes Mobility Fee was adopted via Ordinance 16-192 on December 1, 2015. Its purpose is to ensure that multimodal transportation infrastructure, necessary to support level of service standards, is in place at the time of development. It also creates a platform for developments to contribute to the funding and implementation of those projects in order to mitigate the developments impact to the multimodal transportation network, as well as fund multimodal mobility enhancements not just automobile related improvements. The mobility fee encourages better quality development and is more business friendly as it provides for an easier approval process.

Per the recommendation of the Alternative to Concurrency Study, the Town Council established a Mobility Fee in lieu of traditional transportation concurrency. Chapter 13 Land Development Code Division 2 Sec. 13-2006 (a) states:

The rate per daily trip, and subsequent amendments thereto, shall be established by the Town Council by resolution, based on the methodology as described in subsection (b) of this section. The rate per daily trip shall be reviewed by the Town Council at least once every three years but may be reviewed more frequently. The initial and each review thereafter shall consider changes to the demand component of the mobility fee equation, changes to the Town's CIE, changes in construction, land acquisition and related costs, changes in historical and projected funding, adjustments to the assumptions and conclusions or findings set forth in the Study.

#### <u>Analysis</u>

The 2019 Mobility fee update will review the above as required by Ordinance 16-192, as included in the Miami Lakes Land Development Code and other technical aspects of the fee schedule. Changes in growth rates, traffic generation rates, and land use changes will also be documented in this update memorandum. Any updates to the Mobility Fee proposed will continue to support the funding of multi-modal transportation projects within the Town of Miami Lakes. In addition, any changes to the Mobility Fee will only be based on the most current data per Florida Statutes. The Miami Dade County Long Range Transportation Plan 2045 is not complete, as such it will not be referenced in this update.

This memo documents updates to technical aspects of the fee schedule, such as lower anticipated growth rates, changes in transportation revenue programs, and increased costs of providing transportation facilities and services. Some of the specific changes incorporated include:

- Updating traffic generation rates for some land uses to address a newly- released version of the Institute of Transportation Engineers Trip Generation reference
- Proposing Flat Trip Generation Rates for specific use types
- Gas Station/Service Station with Convenience Store Analysis

- Fast-Casual Restaurant Analysis
- Trip Generation based on vested and committed development projects

#### Recommendations

Trip characteristics utilized in the Mobility Fee were taken from the Institute of Transportation Engineers' (ITE) Trip Generation reference report 9<sup>th</sup> Edition. Changes in this report include updated traffic generation rates provided in the 10<sup>th</sup> Edition Institute of Transportation Engineers' Trip Generation reference, released in late 2017. The changes are listed below:

- 230 Condominium/Townhouse is no longer a land use in the ITE 10<sup>th</sup> edition
- 231 Mid-Rise Residential with 1<sup>st</sup> Floor Commercial and 232 High-Rise Residential with 1<sup>st</sup>
   Floor Commercial were added as they are in the ITE manual 10<sup>th</sup> edition
- 492 Racquet Club/Health Club/Spa/Dance Studio and 437 Bowling Alley rates were changed because of the time period in which the rate was taken. In the 9<sup>th</sup> edition the weekday period was used. However, the 10<sup>th</sup> edition does not have this time period as an option. The rates for these land uses were taken from the weekday, PM peak hour time period.
- 820 Retail (1,000-50,000 s.f) thru 820 Retail (greater than 500,000 s.f.) is one single land use
   820 Shopping Center. The 10<sup>th</sup> edition land use is incorporated.
- 120 General Heavy Industrial is no longer a land use and there is no alternative in the 10<sup>th</sup> edition
- 152 High-Cube Warehouse is no longer a land use, 154-157 were added and are included in the 10<sup>th</sup> edition

Another recommendation is to assess a flat trip rate that is justifiable to apply against acreage and dwelling units. Flat trip rates have now been added as part of the mobility fee update. For the chart below, the trip generation rates for residential land uses are trips/dwelling unit. For commercial, institutional, and industrial, the trip generation rates are per 1000 sq. ft.

Flat Trip Rate for Residential Low Density	7.23
Flat Trip Rate for Residential Low-Med Density	7.32
Flat Trip Rate for Residential Med Density	2.87

#### Gas Stations/Convenience Stores

An additional recommendation for the revision to the Mobility Fee Schedule is to the gas stations with convenience stores use. A recent trend is larger convenience markets with more fueling stations. It is recommended that an amendment be made to pass-by trip percentage from 66% to 77% based on FDOT Trip Generation Recommendations for Convenience Markets with Gas Pumps. There has been an increase in the size on convenience stores and number of fueling positions. These new facilities offer additional services, such as car washes, larger markets, fast food restaurants, and the ability to pay at the pump, have changed travel characteristics.

#### **Fast-Casual Restaurant**

An emerging trend in the area is the Fast-Casual Restaurant. Including Fast- Casual Restaurant (930) in the Mobility Fee Schedule is another recommendation. A fast-casual restaurant is a sit-down restaurant with no wait staff or table service. Customers typically order off a menu board, pay for food before the food is prepared, and seat themselves. The menu generally contains higher quality made to order food items with fewer frozen or processed ingredients than fast food restaurants. The website tripgeneration.org (accessed on 7/19/2018) provided a database of four studies of Fast- Casual restaurants, yielding an average rate of 179.78 trip- ends per 1,000 s.f. The percent new trips and trip length values from the High- Turnover, Sit- Down restaurant were found to be suitable and were applied to this land use. Miami Lakes is a prime location for the development of fast-casual/food hall type dining. The average vehicle trip rate per 1,000 s.f. is 315.17 based on the 10<sup>th</sup> Edition Trip Generation Manual.

#### Trips

Per Ordinance 16-192(b), the rate per daily trip shall be calculated by determining the difference between current development and projected future development levels. The vested and committed projects were reviewed. Based on the total vested and committed projects for 2016-2019 newly approved projects (as compared to when the fee was first adopted), there is an additional 16,684 trips. The following lists trips generated by use:

Total Residential Trips	6,798
Total Multi Use Trips	4,065
Total Commercial Trips	1,443
Total Industrial Trips	310
Total Institutional Trips	934
Total Services Trips	3,134
Total New Trips	16,684

In determining the maximum allowed built capacity, the 2013-2017 ACS housing units (10,397) were subtracted from the FLU maximum allowed built capacity (27,746 d/u), which totaled 17,349 dwelling units. Vested units amount to 1,472. Therefore, there are now 15,876 units of remaining capacity. This is a reduction from the original study from 18,172 housing units, as there are now pending developments.

The total maximum allowed built capacity in acres (taking into consideration the FAR and height) for each land use category is 259 acres for commercial and 528 acres for industrial. There was a reduction in the total maximum allowed built capacity in acres from 555.98 as part of the original study to 528 acres for industrial and from 260 to approximately 259 acres of commercial, due to pending developments within the land use categories. Additionally, 25.09 acres of Commercial and 42.05 acres of Industrial land uses are currently vested. Remaining assessable capacity then, are 234.2 acres for commercial and 485.95 acres for industrial.

As noted previously, there were some changes to the daily weekday person-trip generation due to changes in the Trip Generation Manual 10<sup>th</sup> Edition. Also, flat trip rates have now been added as part of the mobility fee update.

To keep the fee accurate as time progresses, an annual adjustment based on inflation should be made to the assessments of the remaining transportation projects. This adjustment can come from a variety of sources – the Bureau of Labor Statistics maintains a Consumer Price Index as a benchmark, as does the Florida Department of Transportation, in regards to transportation projects, in the form of a Work program inflation factor; the current model accounts for this change by recommending an annual change rate based on the Florida Department of Transportation's rate, given its closer relationship with transportation infrastructure development. Transportation improvement costs from the Town's Capital Improvements Element (CIE), and other adopted Town transportation mobility plans and policies were computed. Costs were adjusted from the time of their original estimation to account for inflation, according to the "Inflation Factors" published by the Florida Department of Transportation (FDOT).

As the impact fee is contingent on the trips generated versus the infrastructure necessary to support the incoming population, as large scale amendments to the future land use accrue, staff should carefully evaluate and consider amendments to the fee in order retain appropriate levels of justification relative to the changes in the build out model utilized in the designation of the fee. Based on evidence that there was very few large-scale amendments, it has been determined after careful review that no future land use amendments since the adoption of the Mobility Fee have a large enough impact on trips generated versus infrastructure to make any changes to the actual fee structure. However, recommended changes are due to updates in the ITE  $10^{\text{th}}$  Edition Manual.

#### Credits

After a full review of the existing mobility fee credits, minor changes are recommended for the mobility fee credit system. These changes include the considerations for technology improvements enhancing local mobility as desired by the Town, and removal of several existing credit categories.

The Town should continue to issue mobility fee credits to developments with the following types of development for the following improvement types:

- Bicycle Parking Spaces
- Mixed Use Development
- Pedestrian Throughways and Bicycle Facilities
- Rear Parking
- Developer/Employer sponsored Transit

No changes to established ratios within the current code is recommended at this time. It is recommended that the Town, similar to other entities in Florida which are adopting Mobility Fees, continue to utilize the 3-year period as the mandated update to review the fee and associated assumptions.

Due to the difficulties in administration, it is recommended that the Town remove the following fee credits:

- Preferred Parking Carpools
- Flexible/Staggered Work Arrangements
- Employer provided Transit Passes

It is recommended that the Town consider the following additions to the fee system:

• Dollar-for-Dollar contribution – It is recommended that the Town include the following in its consideration for text amendments:

"At the sole discretion of the Town, an applicant may elect to construct, pay for, or contribute, a qualified capital improvement or right-of-way contribution to a mobility facility in the mobility network in order to satisfy its mobility fee obligation on a dollar-fordollar basis against the value of said contributed, qualified capital improvement."

In consideration of application of this ordinance, the Town should indicate that qualified capital improvements will include technology improvements that the Town has identified, adopted, and prioritized as part of its strategic planning.

#### Exemptions

There are no recommended changes to Sec. 13-2009. Exemptions.

As projects become fully funded, they should be removed from the list of planned infrastructure requiring funding. These projects, once implemented, will thus not be impacted by annual increases based on inflation. As newer development is approved and funding from the impact is assessed, the impact of that development, both in population growth and trips generated, as well as the fees assessed, count towards both ends of the fee's model structure, which is based on cost per trips generated. The application of reduction of both trips and fees assessed keeps the fees model in equation; as long as the fees assessed are based on trips. Only two of the projects listed as Mobility Fee Expenditures are listed on the Existing Transportation Projects list.

- Initiative 1.1.6 Incorporate Greenway Path (0.38 miles) along NW 60<sup>th</sup> Avenue from NW 154 (Miami Lakes Drive) to NW 138<sup>th</sup> Street- Phase 1 Total estimated project cost is \$1.3 million. \$300,000 Mobility Fee Expenditure
- Initiative 1.9.1 Incorporate Adaptive Signalization along NW 154<sup>th</sup> \$80,940 Mobility Fee Expenditure

When comparing the mobility fee revenues vs expenditures, mobility fees collected in Fiscal Years 2017 and 2018 amount to \$761,271. Expenditures in those same years amount to \$751,503. There was a balance of \$9,768. Projected revenues for Fiscal Years 2019 and 2020 amount to \$1,686,688. This depends on the actual future development permits being processed as proposed. Thus far all mobility funds are accounted for. However, there are a number of transportation projects from the 2014 list that have not been completed. The overall transportation projects list has been updated in order to project cost estimates for the designation of future mobility fees.

#### Mobility Fee

The following represents the methodology to construct and maintain the impact fee system as well as the recommended update to the actual mobility fee.

1. Determine increase in socio-economic data from base year to target future year (20 years). Determination of this factor is based upon the difference between current development levels and future development levels. To accomplish this, the future land use must be employed and compared to existing development.

	2019
Residential	15,876 dwelling units
Commercial	234.2 acres
Industrial	485.95 acres

It is important to note there was an assumed land use spread when calculating the rate for commercial with 20% transit-oriented development/mixed use, 30% office, and 50% retail.

 Determine trip generation rates for resulting land use increases from step 1 above using daily trip rates (weekday) from ITE Trip Gen Handbook 9<sup>th</sup> Edition and Household Survey Model. The updated rates from the ITE Trip Generation Handbook 10<sup>th</sup> Edition were used as part of this update.

	2019 Trips
Residential	86,557
Commercial	522,329
Industrial	16,525
Total	625,411

However, a proportion of this must be taken to relate to the same timeframe as the existing current projects, as this is for 20 years and the CIP is for 5 years. Growth is not linear, but rather based on existing market conditions – this is a primary reason why the fee must be

adjusted with new assumptions every 3 years. For the current cycle, we expect growth to continue at similar pace as before, with some slowdown due to the amount of existing growth, and assume a slower 10% growth in trips.

Assuming 10% the daily trips generated is:

2019 daily trips	<u> </u>	0
62,541		

3. Compute transportation improvement costs from the Town's Capital Improvement Element (CIE), Transportation Master Plan (TMP), the Town's transportation mobility plans, and Unfunded Projects from the MPO's Long Range Transportation Plan (LRTP).

Using the compiled transportation projects master list (Attachment C), an aggregate cost to complete all the projects can be constructed. In considering the various projects that can be built, it is importation to consider that there are projects which may have funding that is reasonably expected from outside funding sources, including grants. In cases where this funding is reasonably expected, these projects should not be included in the computation costs.

Rationale: Not Included = Projects fully funded in the MPO's Transportation Improvement Program (TIP) and those from their LRTP where funding is reasonably expected (federal, state, county and other). Included = Projects included in the Town's Transportation Master Plan (TMP) and the Capital Improvement Element (CIE) such as roadway widening, roadway reconstruction, road resurfacing, lighting, traffic signals, roadway drainage, intersection improvements, roadway landscaping, sidewalks, bike paths.

The costs as noted in the previous report were current at that time. However, as the projects were carried over for multiple years, inflation factors were included using the FDOT Work Program inflation factors.

Additional projects have been placed in the Town's Master Plan, resulting in a need to adjust the fee.

2014	2019
\$12,549,293	\$35,170,229

For the 2019 numbers, it should be noted that \$1,114,086 has been previously collected for local improvements. In addition, the Town is slated to receive \$9,096,994 in grants. The remaining \$ 24,959,149 are unvested and unfunded items the Town intends to assess as part of the mobility fee. \$ 12,479,575 of the projects should be assessed to implement the new multimodal facilities to mitigate future impact of trips.

In addition, the Town's recently adopted SMART Technology Implementation Plan 2020-2035 contains \$15,194,500 of projects for implementation, of which \$14,309,500 is eligible as mobility-based projects. Given the timeframe and adopted strategic action items, the combination of master plan and technology implementation plan is \$26,789,075.

4. Compute Total Cost per Daily Trip

For the purposes of this calculation, we are utilizing the Total cost per daily trip as indicated by the expected daily trips based on the designated build out, as this is a more accurate representation of expected development in the time period.

Total cost per daily trip = Total Cost/daily trips generated		
2014 Total Cost per daily trip	2019 Total Cost per daily trip	
\$160.00 per trip	\$428.34 per trip	

 $J_{2}$   $J_{2$ т

The per fee trip has increased due to a change in the number of trips resulting from the update of the ITE Trip Generation Manual and due to the increase in the cost and number of transportation projects, which added approximately \$2.7 million in additional costs. The latter factor is the primary factor in the increase. As stated previously, the 9<sup>th</sup> Edition was used for the previous study.

5. Add 5% administrative costs.

#### Total Per Trip Fee \$449.76.

In summary, costs were updated to take into account inflation, updates to the Town's TMP, CIE, and the MPO's LRTP, and newly approved developments.

#### Operational improvements:

During the course of the study, it was indicated that certain land use categories have higher than average fees due to the potential for high trip calculations. In those cases, it is recommended that the Town utilize a pass-through factor mutually agreed upon by both the Town and the applicant to reduce the number of trips in unique cases. Pass through rates are provided within the ITE Trip Generation Manual, 10<sup>th</sup> Edition, and have been updated from the prior 9<sup>th</sup> Edition Manual.

Further, the current ordinance provides that Council may, at its discretion, agree to lower the fee assessment on a case by case basis. It is recommended that the Town continue to keep this provision of the ordinance and exercise as needed in unique cases such as with the above.

Subject:	Miami-Dade County (MDC) 2020 Neat Streets Miami's Street Tree Matching Grant Program	
Date:	December 10, 2019	

### **Recommendation:**

It is recommended that the Town Council authorize the Town Manager, to apply for, and if awarded, expend budgeted funds for the 2020 Street Tree Matching Grant Program in an amount not to exceed \$41,470 to assist in funding the Miami Lakes West Lake Reforestation Phase 4 Project. The Town's match source is budgeted under Tree Permitting Revenue and \$41,470 is available for this Project.

### Background

The Miami-Dade County Neat Streets Miami's Street Tree Matching Grant Program aims to reach the Million Trees Miami goal of planting one million trees to achieve a 30 percent tree canopy in Miami-Dade County. The Grant engages municipalities, non-profits and community organizations in planting native or Florida-friendly trees on the County's corridors and gateways. The goal of this program is to leverage the County's street tree program by encouraging investments on County or local streets. Grants will be awarded to those communities who can demonstrate the greatest benefits for residents, employers and visitors. Agencies are invited to submit applications for projects that can be developed for Fiscal Year 2020.

The Neat Streets Miami's Street Tree Matching Grant will assist the Town in funding the Miami Lakes West Lake Reforestation Phase 4 Project. The Project's goals are to enhance tree canopy, provide shade, and create memorable landscape aesthetics in an area of the Town in desperate need of canopy trees. The Project will plant an estimated 130 Florida Friendly trees from a variety of species at various locations to include:

1) NW 144th Terrace, between NW 89th Avenue and NW 92nd Avenue

2) NW 145th Street, between NW 89th Avenue and NW 92nd Avenue

3) NW 145th Lane, between NW 89th Avenue and NW 92nd Avenue

4) NW 147th Lane, between NW 87th Avenue and NW 89th Avenue

5) NW 88th Place, between NW 147th Lane and NW 148th Terrace

The Project is estimated at \$82,940. The Grant requires a 50% local match and no more than 50% of the total project costs will be awarded to any single applicant. The Town's match source is budgeted under Tree Permitting Revenue and the local match of \$41,470 is available for this Project.

The Board of County Commissioners of Miami-Dade County, through Resolution No. R-475-18, directed the County Mayor or County Mayor's Designee to develop an interlocal agreement, to be entered into between the County and municipalities located within Miami-Dade County, for municipalities engaged in tree planting to provide periodic reports to the County regarding their tree plantings. In 2019, the Town entered into an interlocal Tree Planting Reporting Agreement with Miami-Dade County. The Agreement is in effect for a three-year period and is included with this Memorandum as "Exhibit A".

Studies show that trees contribute significantly to the environment, human health, energy savings, and quality of life. The Town successfully completed the West Lake Reforestation Phase 1, Phase 2, and Phase 3 Projects in partnership with the Neat Streets Miami Street Tree Matching Grant Program. The Miami Lakes West Lake Reforestation Phase 4 Project will complete the next phase as part of the Town's Strategic Plan and Beautification Master Plan and will assist Miami-Dade County with reaching its Million Trees Miami goal to achieve a 30 percent tree canopy for Miami-Dade County.

Subject:	Merger of Royal Oaks East Special Taxing District Advisory Committee and Royal Oaks Section I Special Taxing District Committee; Creation of Royal Oaks Combined Special Taxing District Advisory Committee
Date:	December 10, 2019

### **Background:**

As the result of a referendum passed in 2018, by Town Residents residing in the established Royal Oaks Section One and Royal Oaks East Special Taxing Districts, Miami-Dade County Management and oversight of the respective Special Taxing Districts was transferred from Miami-Dade County Board of County Commissioners to the Town of Miami Lakes Council. A major impetus for the referendum was residents desire to have local control of the Special Taxing Districts that managed security in their neighborhoods. Accordingly, and in the spirit of providing Town Residents residing in the Special Taxing District with a platform to provide direct input on the budgeting and operation of their Special Taxing District, the Town created Special Taxing District Advisory Committees.

During 2019, the Royal Oaks East Special Taxing District Advisory Committee and Royal Oaks Section I Special Taxing District Committee struggled to achieve the necessary quorum. Additionally, many of the concerns raised by the Royal Oaks East Special Taxing District Advisory Committee had a direct correlation and effect on the Royal Oaks Section I Special Taxing District Advisory Committee.

During the November 2019 Town Council meeting, the Town Council provided staff with instructions to merge the existing special taxing districts and provide a framework that would provide for equitable representation. Based on a review of the district it was discovered that both districts combined were composed 59% from Home Owner Association members and 41% from Non-Home Owner Association members. Additionally, 52% of the residents reside in the Royal Oaks Section I Special Taxing District Committee and 48% reside in Roayl Oaks East Special Taxing District.

Based on this division, the attached resolution establishes a new committee, merging the existing two special taxing districts and creating a new committee that will have equitable representation.

#### **Recommendation:**

It is recommended that the Town Council approve passage of this Resolution, which merges the existing and respective Royal Oaks East Special Taxing District Advisory Committee and Royal Oaks Section I Special Taxing District Committee into the newly created Royal Oaks Combined Special Taxing District Advisory Committee.

#### **RESOLUTION NO. 19- 1584**

#### **Recommendation:**

For some time now we have been discussing alternate ways to communicate with the residents. We have revamped our website, created the interactive Imagine 2025 site, we live stream meetings, allow for pre-recorded and live public comments, use various social media platforms to promote town events and economic development within the Town of Miami Lakes and much, much more. However, we still fall short on reaching our audience for some of the more important meetings.

In the past we have selectively promoted certain events more than others as well as not promoted some meetings at all. I continuously receive phone calls about town related events or meetings that residents are not informed about. I understand that we have been properly noticing our meetings but proper does not always equal effective. We have made great strides with respect to social media strategies for events but we can certainly do better with respect to workshops and meetings. We must reach our residents to inform them of meetings that majorly affect their quality of life.

I would like to direct the manager to work with our communications department to come up with strategies to fill this communication gap. I would like for them to come back in January 2020 to present their plan.

#### **Recommendation:**

During the September 2016 Town Council Meeting, the Town Council provided direction to Town Staff to study the possibility of establishing a Town of Miami Lakes Mediation process by which residents would be able to resolve inter-neighbor conflicts through an informal mediation process, rather than resorting to the Town Code Enforcement Court Magistrate process.

An interesting discovery is that the statewide, Circuit and County Court mediation resolution process had its genesis in municipal courts through a non-profit concerned citizens group. As municipal courts were dissolved, municipalities abandoned this process. However, there are processes that remain, for example Saint John County.

Attached is a proposed process that the Town can adopt for matters in which the Town is a party and for matters in which the Town is not a party.
