

Town of Miami Lakes Memorandum

To: Honorable Mayor & Councilmembers

From: Edward Pidermann, Town Manager

Subject: Stormwater Rate Study Workshop

Date: August 11, 2020

On September 10, 2019, the Town Council passed Resolution No. 2019-1631 approving a work order for Wood Environment & Infrastructure Solutions, Inc. ("Wood") for the Stormwater Rate Study, in an amount not to exceed \$40,255.80. The purpose of the study is to determine an appropriate utility fee that would advance the goals of the stormwater program and accelerate the implementation of stormwater capital projects.

An initial stormwater rate study workshop was conducted on May 12, 2020 with the Town Council to share initial findings and to gain feedback on changes that may impact the stormwater program. Based on feedback received at this workshop, staff and the consultant conducted further analysis to determine options to address current and future demand for funding to address known and anticipated resources to meet capital improvement needs as well as sustain and improve drainage system performance and maintenance goals.

The stormwater rate study report has been finalized. The intent of this workshop is to present the final report and discuss the analysis and recommendations.
